

Illustrated Catalogue D.

With 1904 Supplement.

Garden, Lawn, Cemetery and Park Adornments.

M. D. JONES & CO.,

71 and 73 Portland St.,

BOSTON, MASS., = = = U. S. A.

OFFICE OF
M. D. JONES & CO.,

Nos. 71-73 Portland St.,

BOSTON, MASS.

We beg to hand you our New Illustrated Catalogue of Garden, Lawn and Cemetery Adornments. Realizing the difficulty of selecting Garden and Cemetery Vases from illustrations, we have made a new departure in this catalogue by illustrating not only the different designs, but also most every size, and in such ways as with handles or without, with high or low pedestals, etc.

We have got out new cuts made on a scale of about $1\frac{1}{2}$ inch to the foot, taken from the photographs of the vases themselves.

Our line of designs and sizes of Vases is now so large that Vases from this catalogue can be easily selected for any position that is desired to place them.

We have heretofore constructed special designs of Fountains, Drinking Fountains, and other ornamental work and superintended the placing of the same on public and private grounds, furnishing drawings and estimates for the same. Correspondence solicited.

We desire to thank our friends and the public generally for many favors in the past, soliciting a continuance of the same.

We remain yours respectfully,

M. D. JONES & CO.

BOSTON VASE.

“ “ “ with Low Pedestal	11.75	14.00

RESERVOIR VASES.

Our Improved Reservoir Vases are so constructed, that after once watering, the earth is kept moist a long time, at the same time the roots of the plants do not come in contact with the water underneath, and still leaves room enough for soil and roots of plants while all other Reservoir Vases sacrifice too much of the capacity of the Vase. Vases not only need moisture but all the earth room possible. See diagram.

No. 2 1-2 Berlin Reservoir Vase.

With Handles and No. 2 1-2 Low Pedestal.

Height of Vase over handles, 30½ inches. Diameter of Vase over handles, 39 inches. Height of Vase over handles including Low Pedestal, 37½ inches.

Metallic Designs for any Society made to order.

DRINKING FOUNTAINS.

The essential requisites of a Drinking Fountain are strength and durability, a large and ever changing quantity of water and convenience in use of same, rather than elaborate and costly design.

Horses can drink at this Fountain without unchecking.

Special designs made to order
Estimates furnished.

The above illustrates a special Drinking Fountain erected by us for the City of Somerville, Mass.

NO. 1A DRINKING FOUNTAIN.

Height to bottom of electric light and frame, 18 feet.

Height to top of horse trough, 4 feet, 6 inches.

Horse trough, 4 feet, 5 inches long x 2 feet, 5 inches projection; 1 foot, 2 inches deep; size of base, 5 feet, 4 inches.

Price less Electric Light Frame and Lamp One Coat Paint, \$650.00; Bronzed, \$685.00

No. 10.

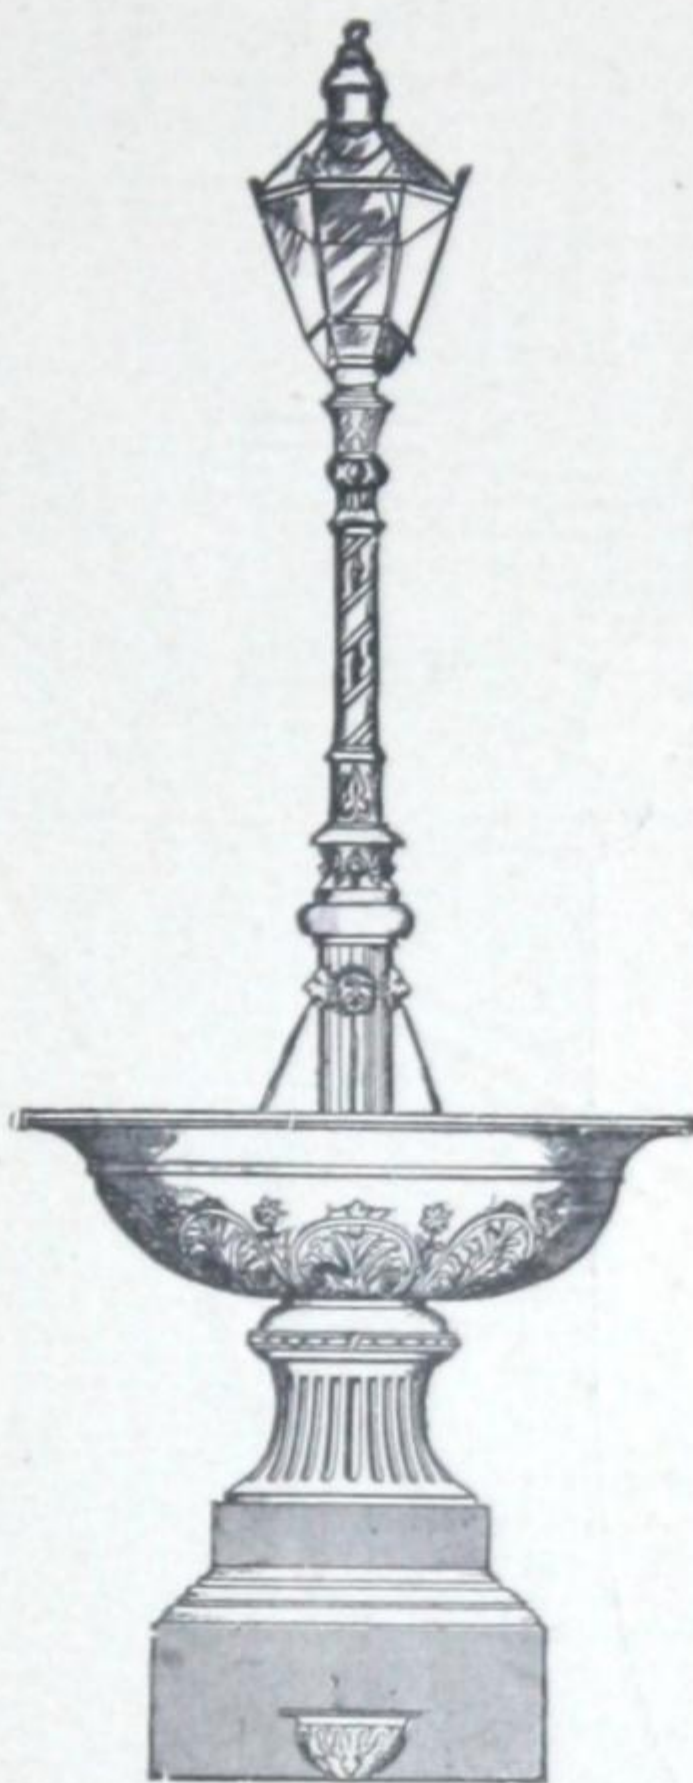

No. 50 (New.)

Ball cock supply, add \$25.00

4 self-closing faucets for \$36.00.

No. 20.

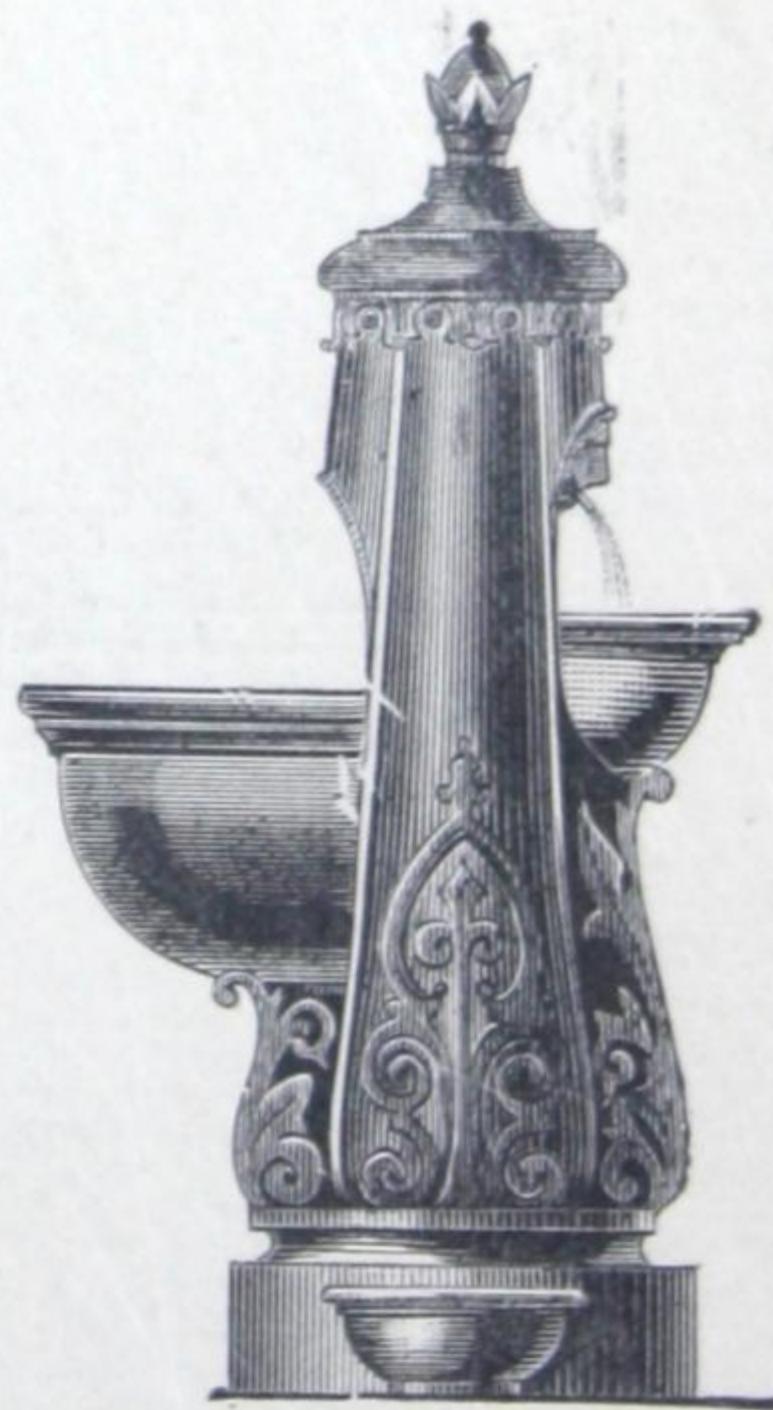

No. 12.

No. 14.

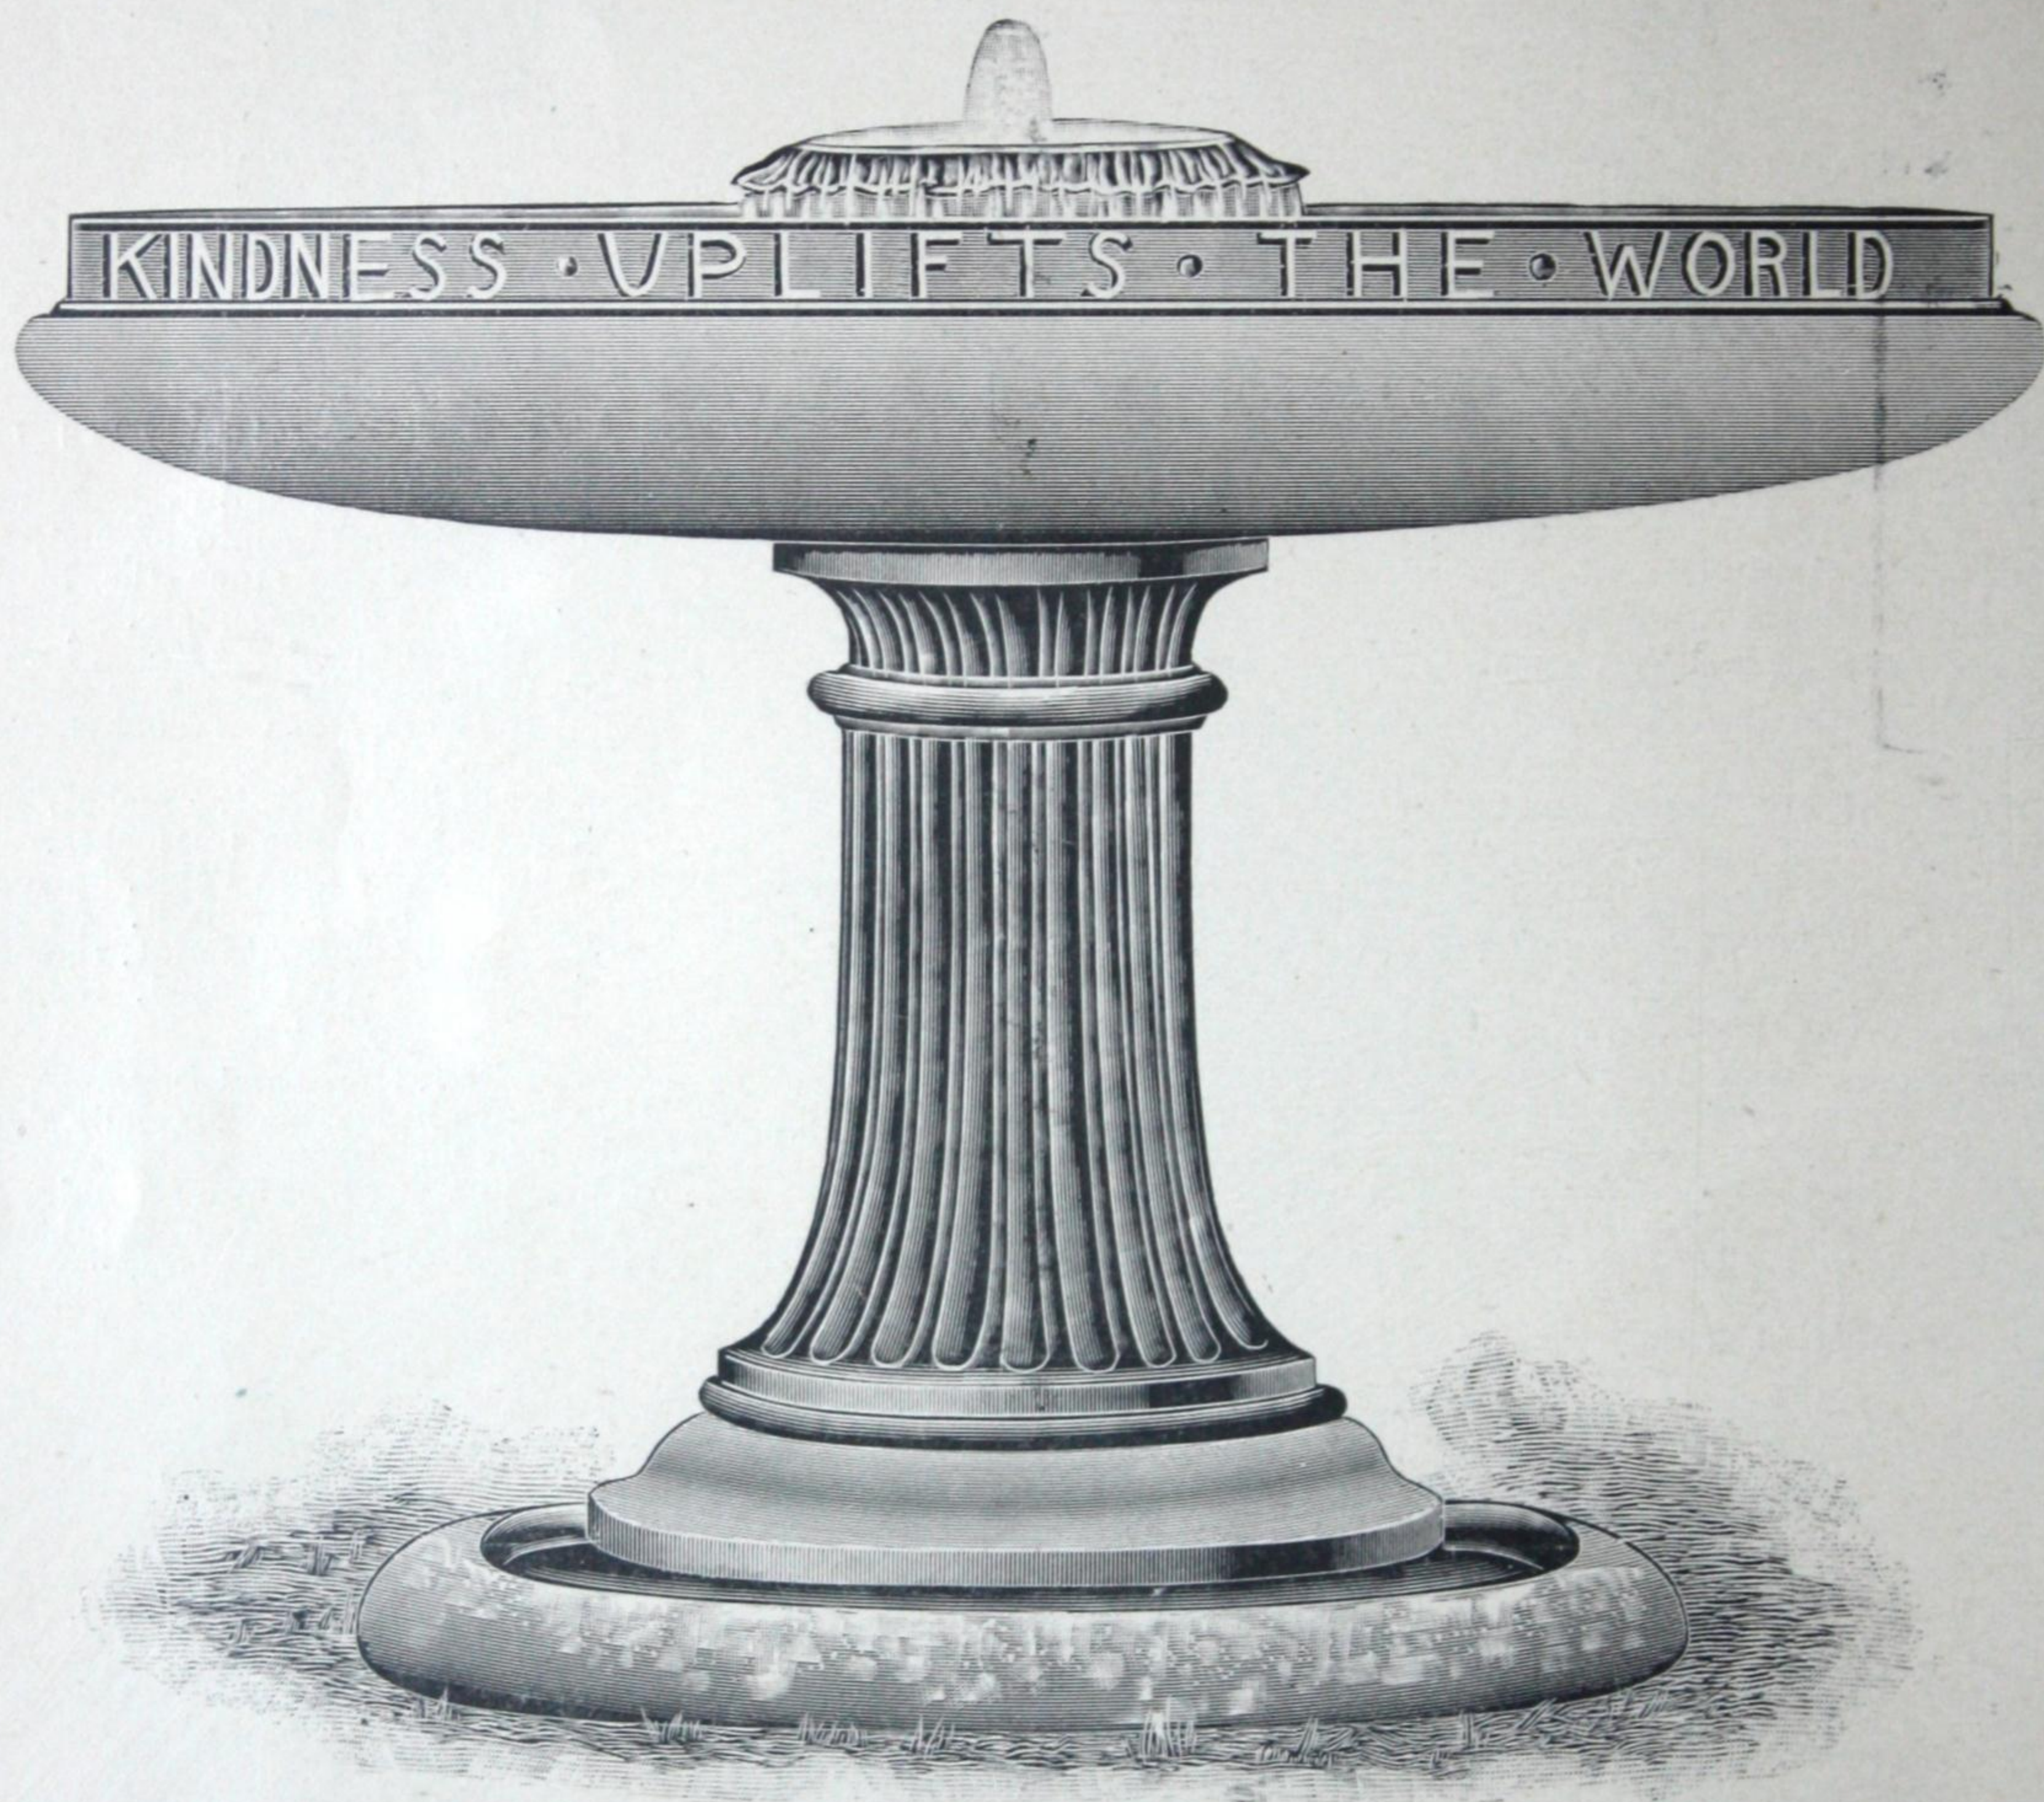

When arranged for stone the base plate is 1 foot 10 inches square.

Paint, \$140.00; Bronze, \$150.00

DRINKING FOUNTAIN NO. 50 (New).

Very strong. Four two-horse teams can drink at this Fountain at one time.

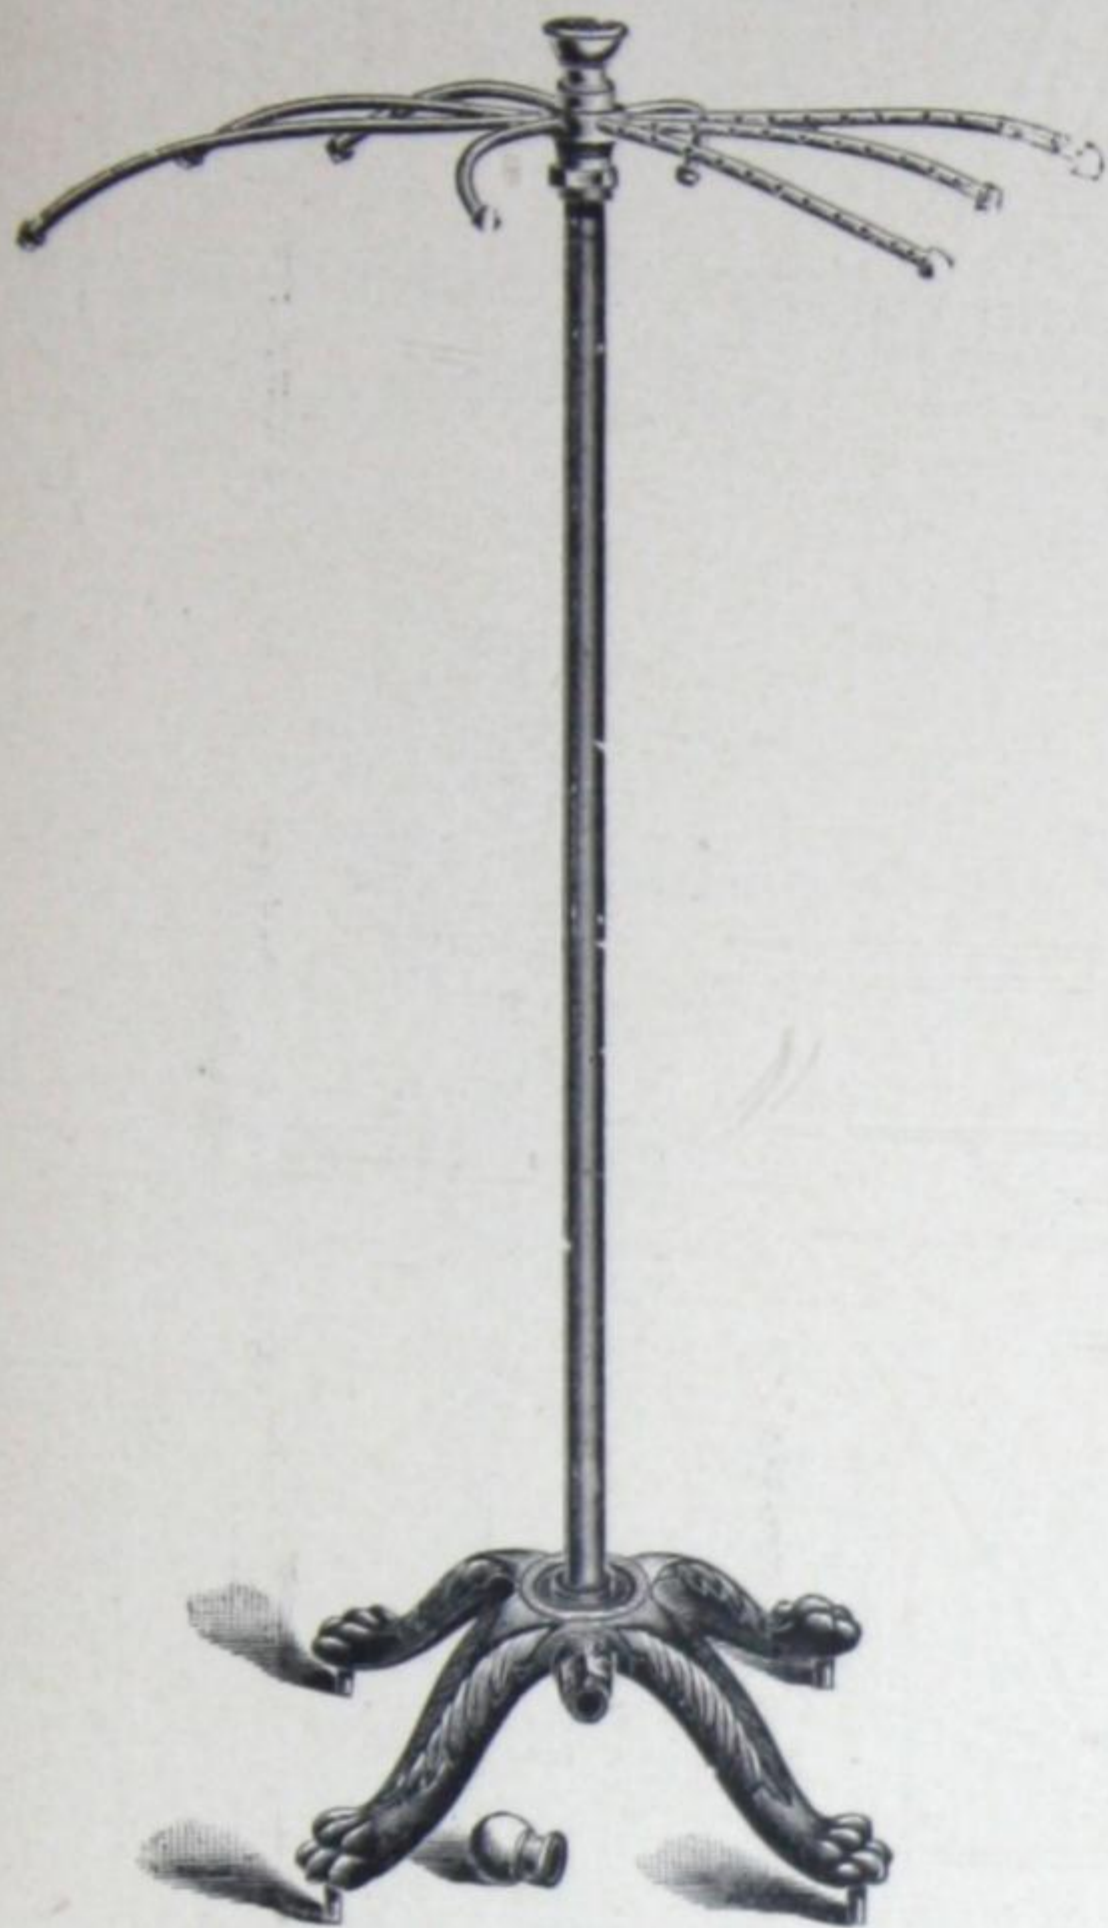

Height 4 ft., 4 inches. Diameter of basin 6 feet.

Price of Fountain (without rim for Dog Trough) \$400.00.

Rim for Dog Trough can be made out of Granite or artificial Stone.

This fountain was designed by Mr. John C. Clapp, Jr., of Boston, and approved by the Boston Art Commission, April 22, 1901. One of this design was erected in Hancock Square, Charlestown Mass., through the zeal and energy of Mrs. Huntington Smith, under the auspices of the Animal Rescue League. It was ready for use in October, 1902. No Drinking Fountain in Boston is more persistently used. It is thronged with teams all day long.

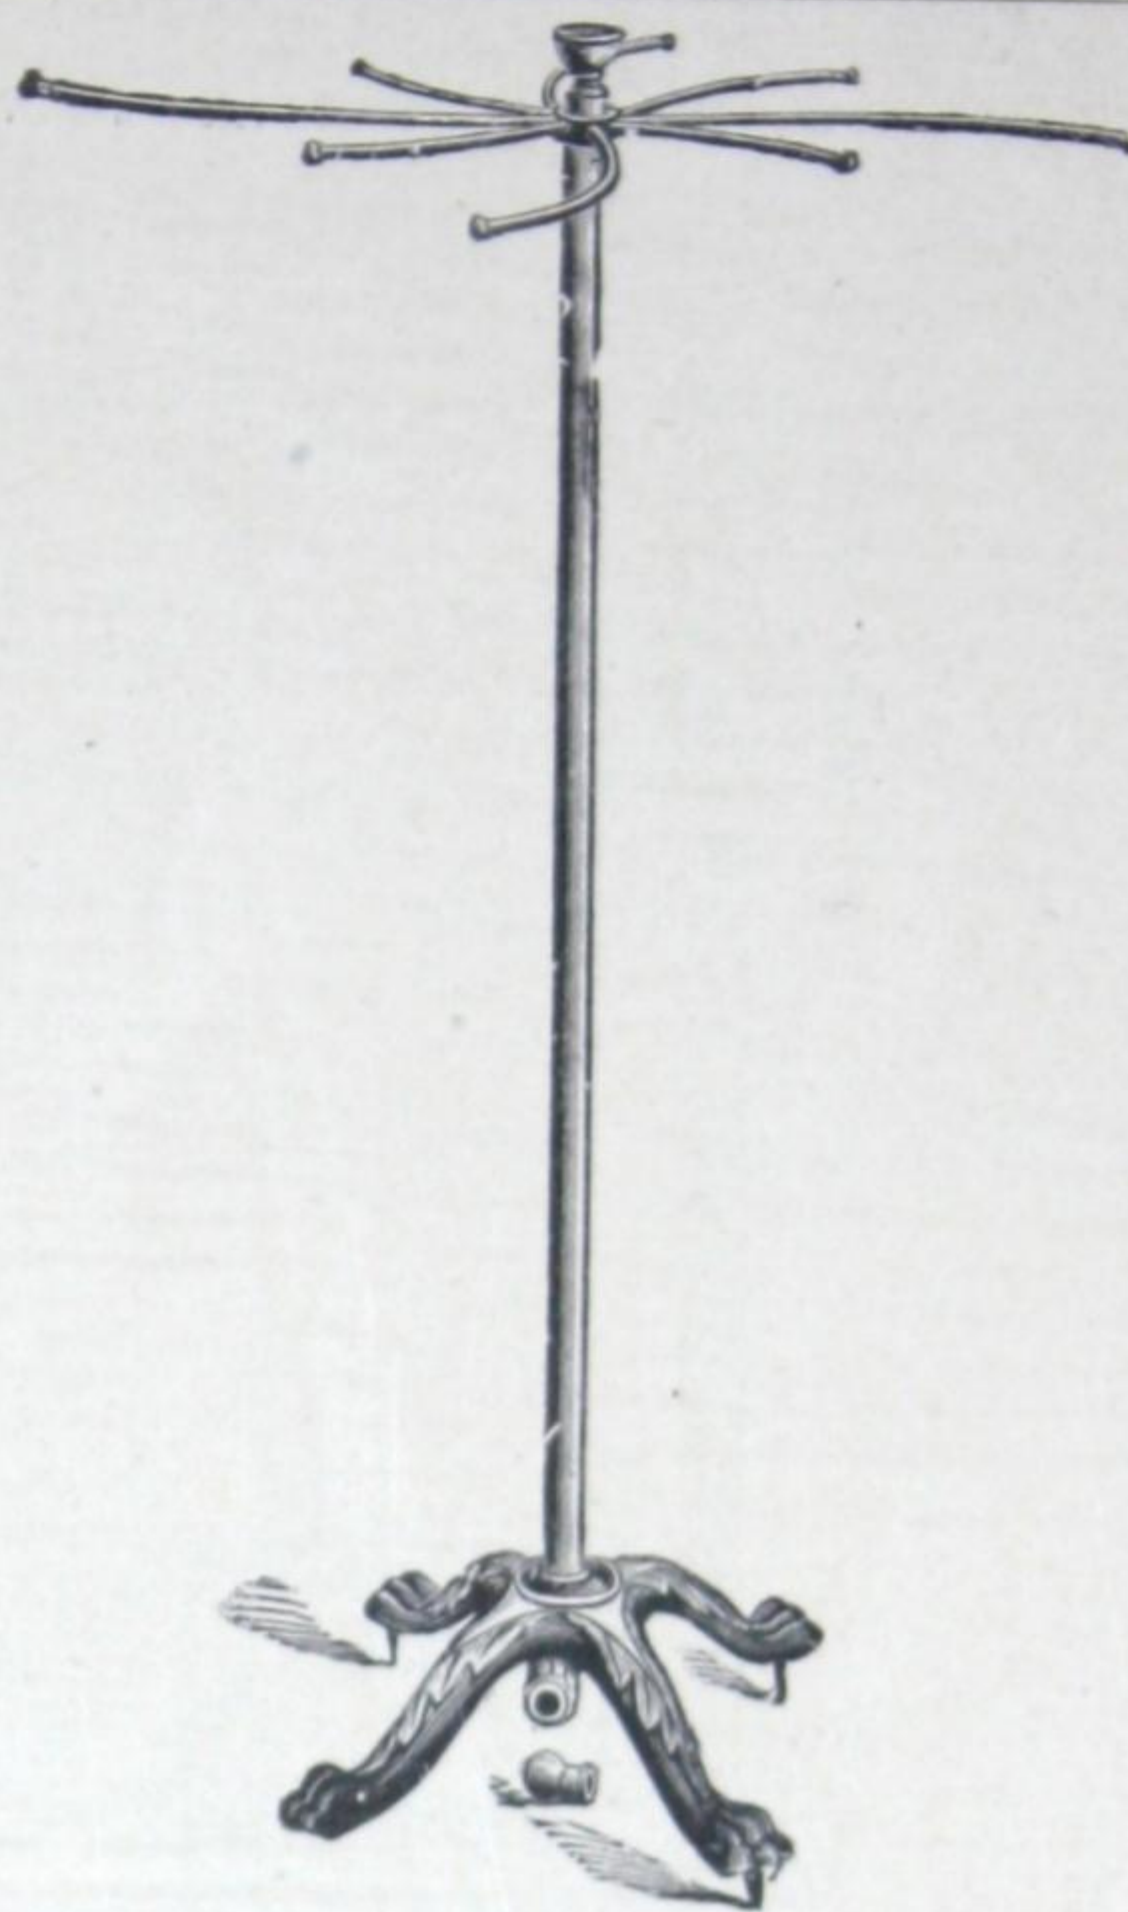

Nos. 1 and 1 1/2, 4 Large Arms.
" 2 " 2 1/2, 6 " "

JONES' IMPROVED LAWN SPRINKLERS.

All our Sprinklers are fitted for one-half and three-fourths inch Hose.

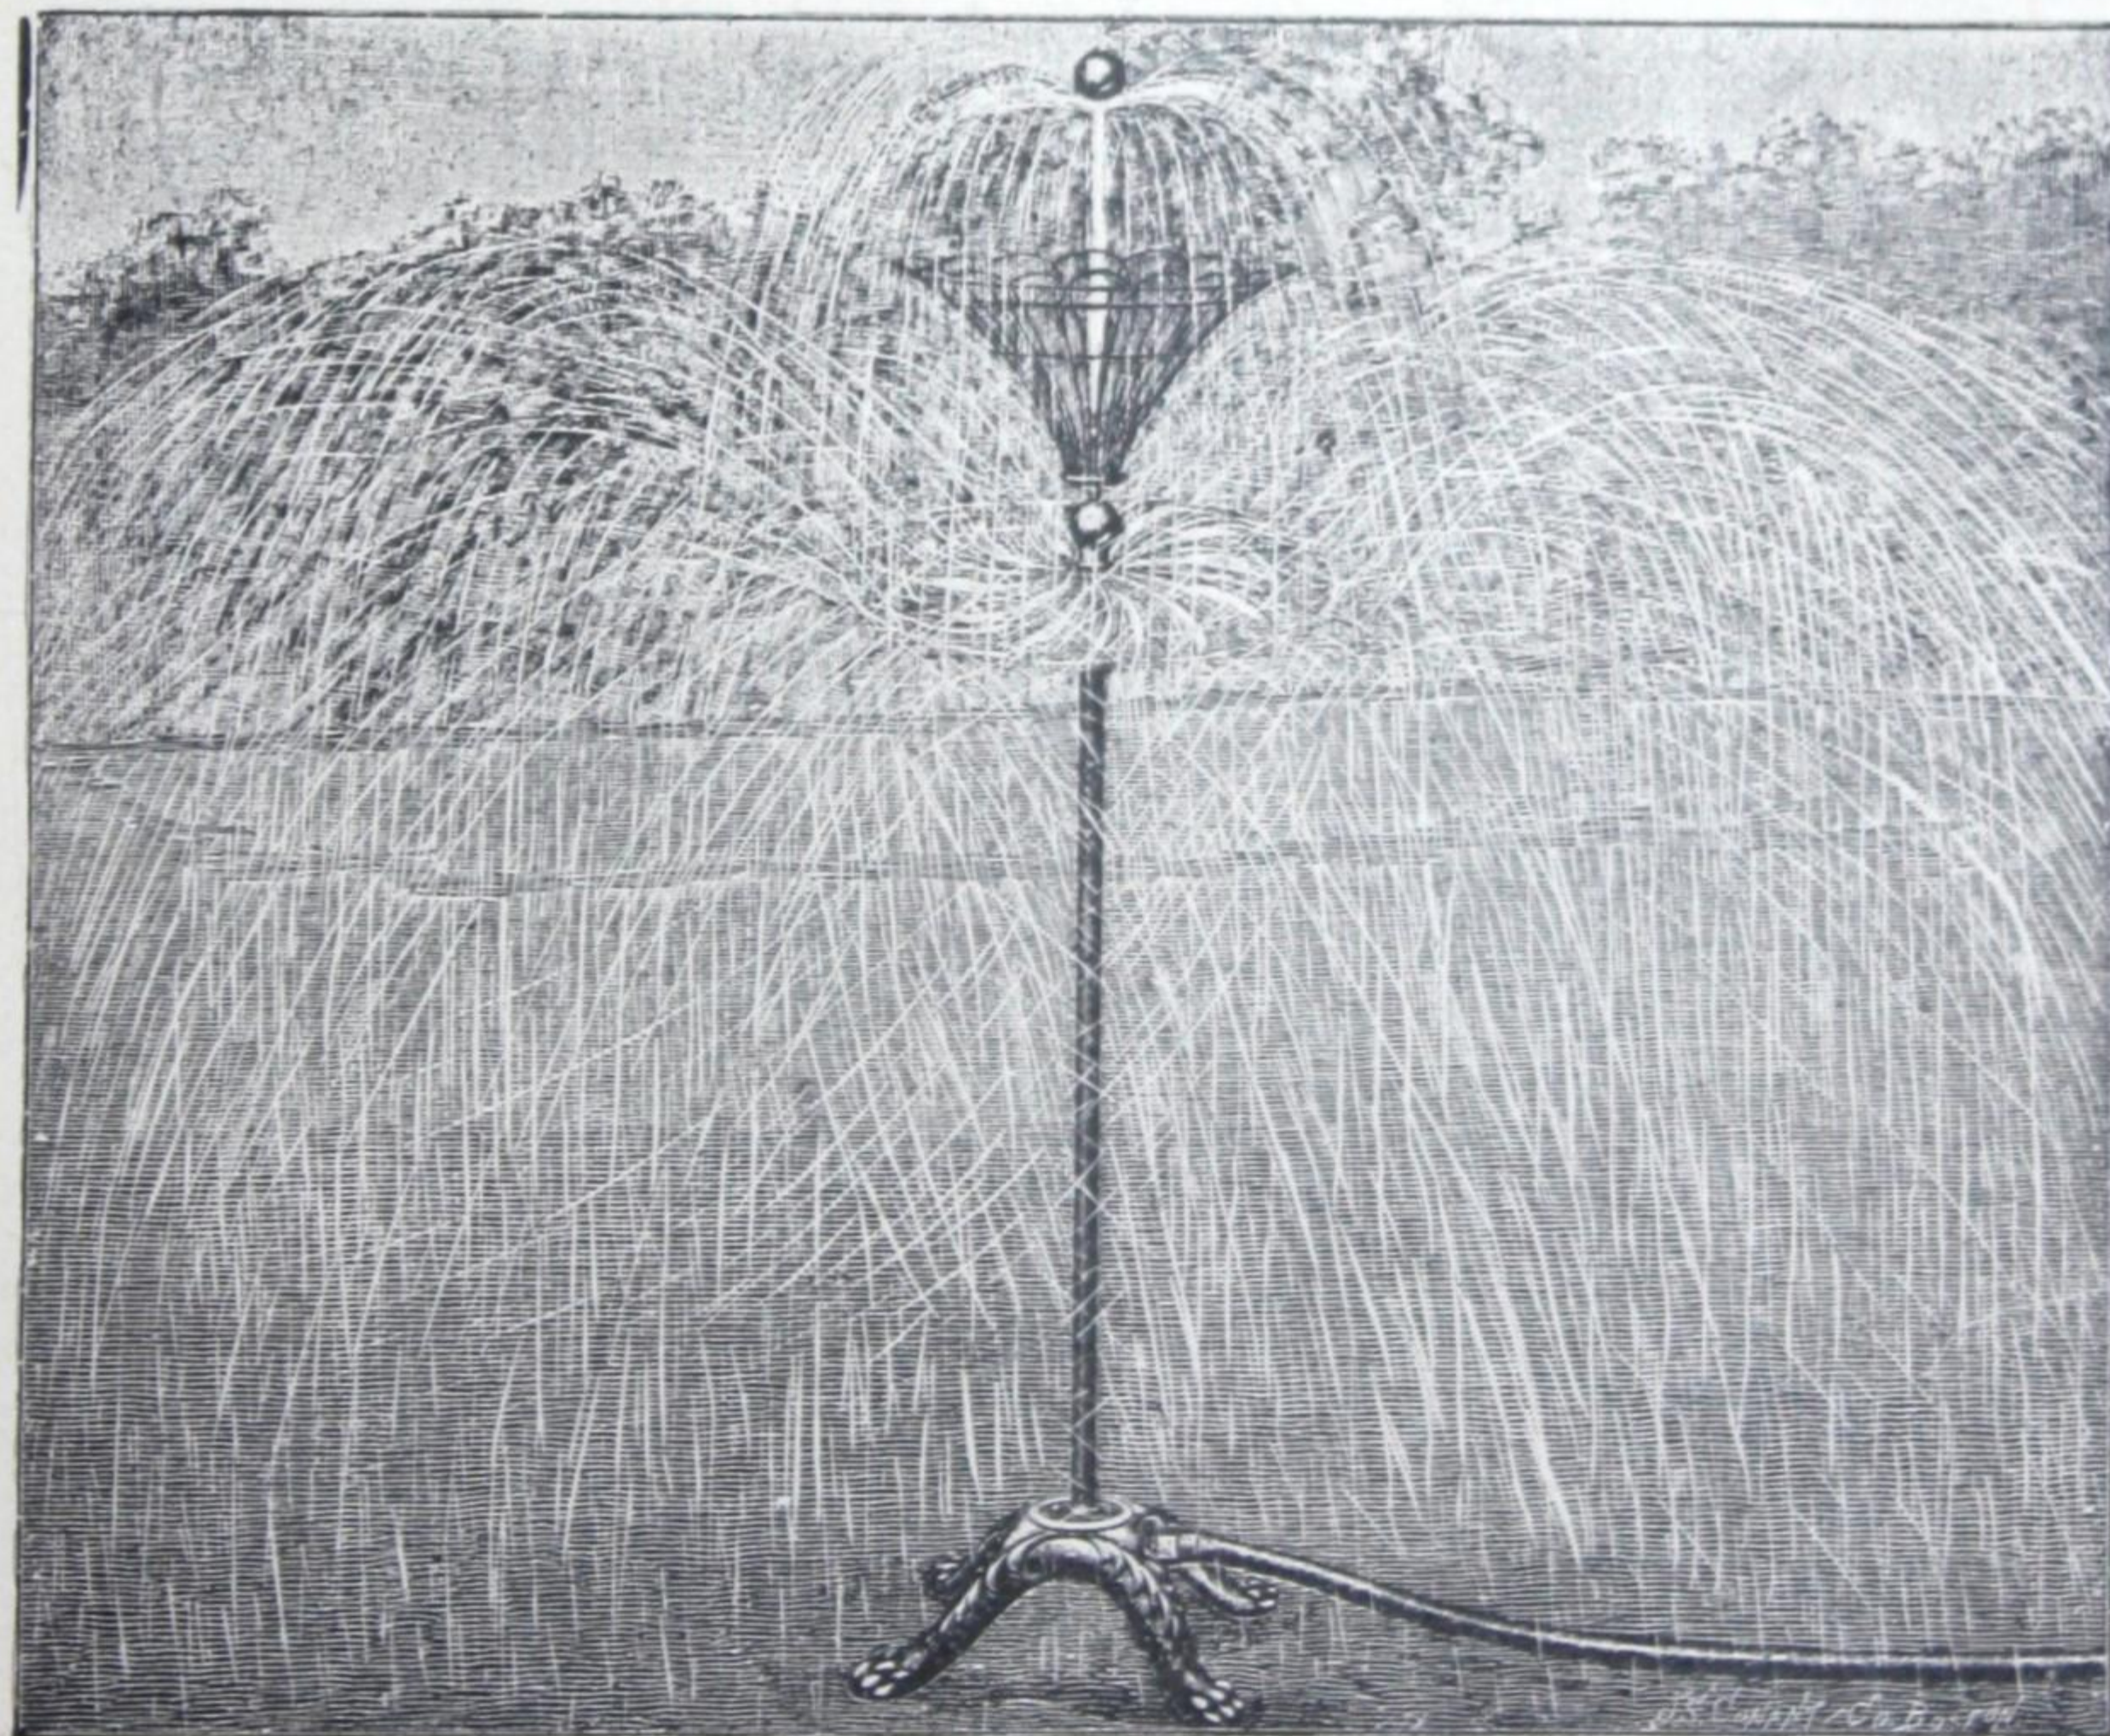

Solid Ball Cap is for use in place of the Spray Jet when there is a light pressure of water, and to give greater velocity to the revolving Arms. The use of Spray Jet instead of Solid Ball Cap requires more water and produces a better effect.

Nos. 5 and 5 1/2, 8 Arms,
4 Long and 4 Short Arms.

No.	Price.
1 — Nickel Plated Arms and Jet, Four Arms, with Solid Ball Cap, with Stand, complete	\$5.85
1 1/2 — " " " " " " without Solid Ball Cap, with Stand, complete	5.50
2 — " " " " " Six " with " " " " " "	6.85
2 1/2 — " " " " " " without " " " " " "	6.50
5 — " " " " " Eight " with " " " " " "	7.35
5 1/2 — " " " " " " without " " " " " "	7.00

JONES' IMPROVED LAWN SPRINKLERS, WITH BALL AND BASKET JET.

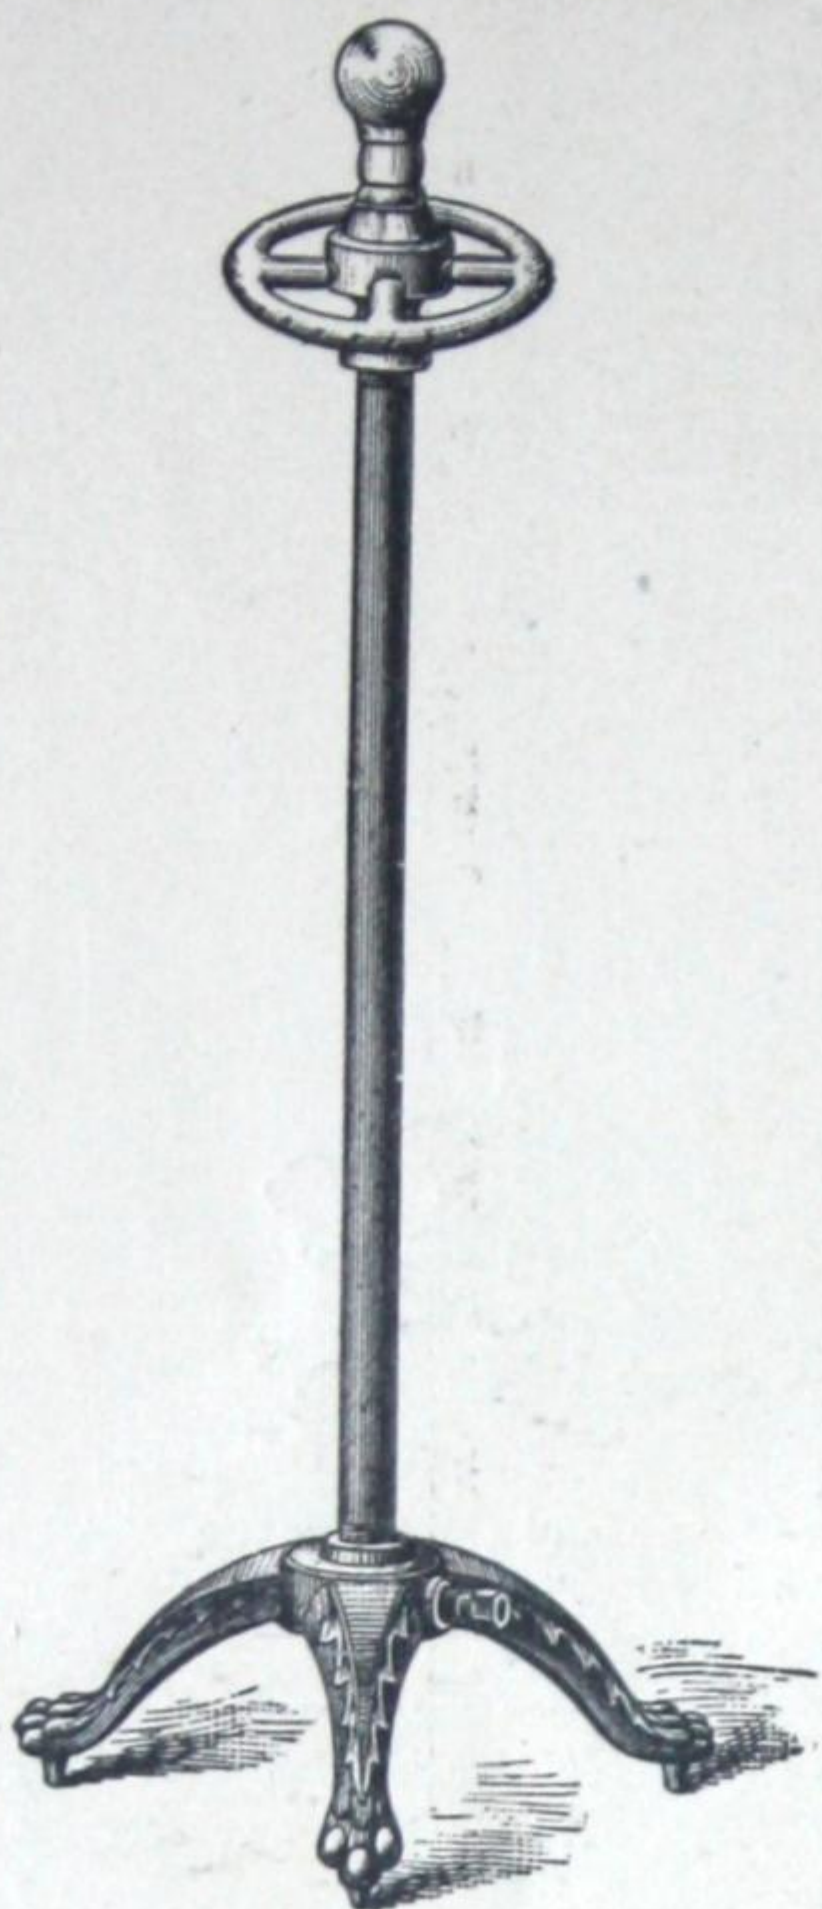

No.	Price.
1 — Four Arms, Jet and Solid Ball Cap, with Ball and Basket Jet, complete	\$ 9.35
1 1/2 — Four " " without Solid Ball Cap, with Ball and Basket Jet, complete	9.00
2 — Six " " and " " " " " " " " " "	10.35
2 1/2 — Six " " without " " " " " " " " " "	10.00
5 — Eight " " and " " " " " " " " " "	10.85
5 1/2 — Eight " " without " " " " " " " " " "	10.50
Ball and Basket Jet, complete, can be attached to Nos. 1, 1 1/2, 2, 2 1/2, 5, 5 1/2 Lawn Sprinkler	3.50

The Arms of the above Sprinklers revolve by the pressure of water playing through the Arms, at same time the center Jet throws a stream which sustains the Ball on top of the stream. The Ball is nickel plated.

JONES' COMBINATION LAWN SPRINKLER.

Patented November 10, 1891.

Greater variety of combinations of water display can be made with this Lawn Sprinkler than any other.

Size, 28 inches. Diameter of Revolving Jet 4 1/4 inches.
Price each, \$5.00
Can be used with Spray Jet on top instead of ball top.

No. 1. Position of Arms.
Plays a Spray. Does not Revolve.

No. 2. Position of Arms.
It will revolve and throw the water equal in distance to any other and distribute the water more evenly.

No. 3. Position of Arms.
Sprinkler revolving at its greatest speed makes a very pretty effect of water display, also the arms can be placed in such a position that it will spray in a half circle, so that you can place sprinkler near a walk and sprinkle the lawn without wetting the walk.

Improved Globe Lawn Sprinkler.

This is a revolving sprinkler with addition of Straight Fountain Jet and both playing at same time.

Price each, \$1.25

Strongest Sprinkler made—most durable. Arms are finished castings, not tubing, and for irrigation purposes the best on the market.

JONES' PATENT HOSE MENDER.

Patented July 1, 1890.

This Cut is Exact Size of 3/4 Inch Mender.

This Hose Mender has stood the test of time and is now a standard article in the Hardware and also in the trade in Hose Supplies.

Its advantages are as follows:

The size of bore is exact size of internal diameter in the Hose to which it is applied, so that it does not obstruct the flow of water while all others do obstruct.

The threads on mender lead from small to large so that it adheres to hose the whole length and will not blow out. No tools or bands required.

Price per gross, 1-2 inch, \$4 80; 3-4 inch, \$6.00; 1 inch, \$10.20.

M. D. JONES & CO., 71 and 73 Portland Street, Boston.

Illustrated (1904) Supplement to Catalogue D.

Catalogue D illustrates our line of Iron Garden Vases, Bouquet Holders, Settees, Chairs, Cemetery Signs, Rustic Work, Metallic Wreaths, Crosses, Drinking Fountains, Lawn Sprinklers, Hose Menders, Etc., Etc.

" 6500 Green " "	5.00

METALLIC PILLOWS.

Nos. 9500 P and 1500P.

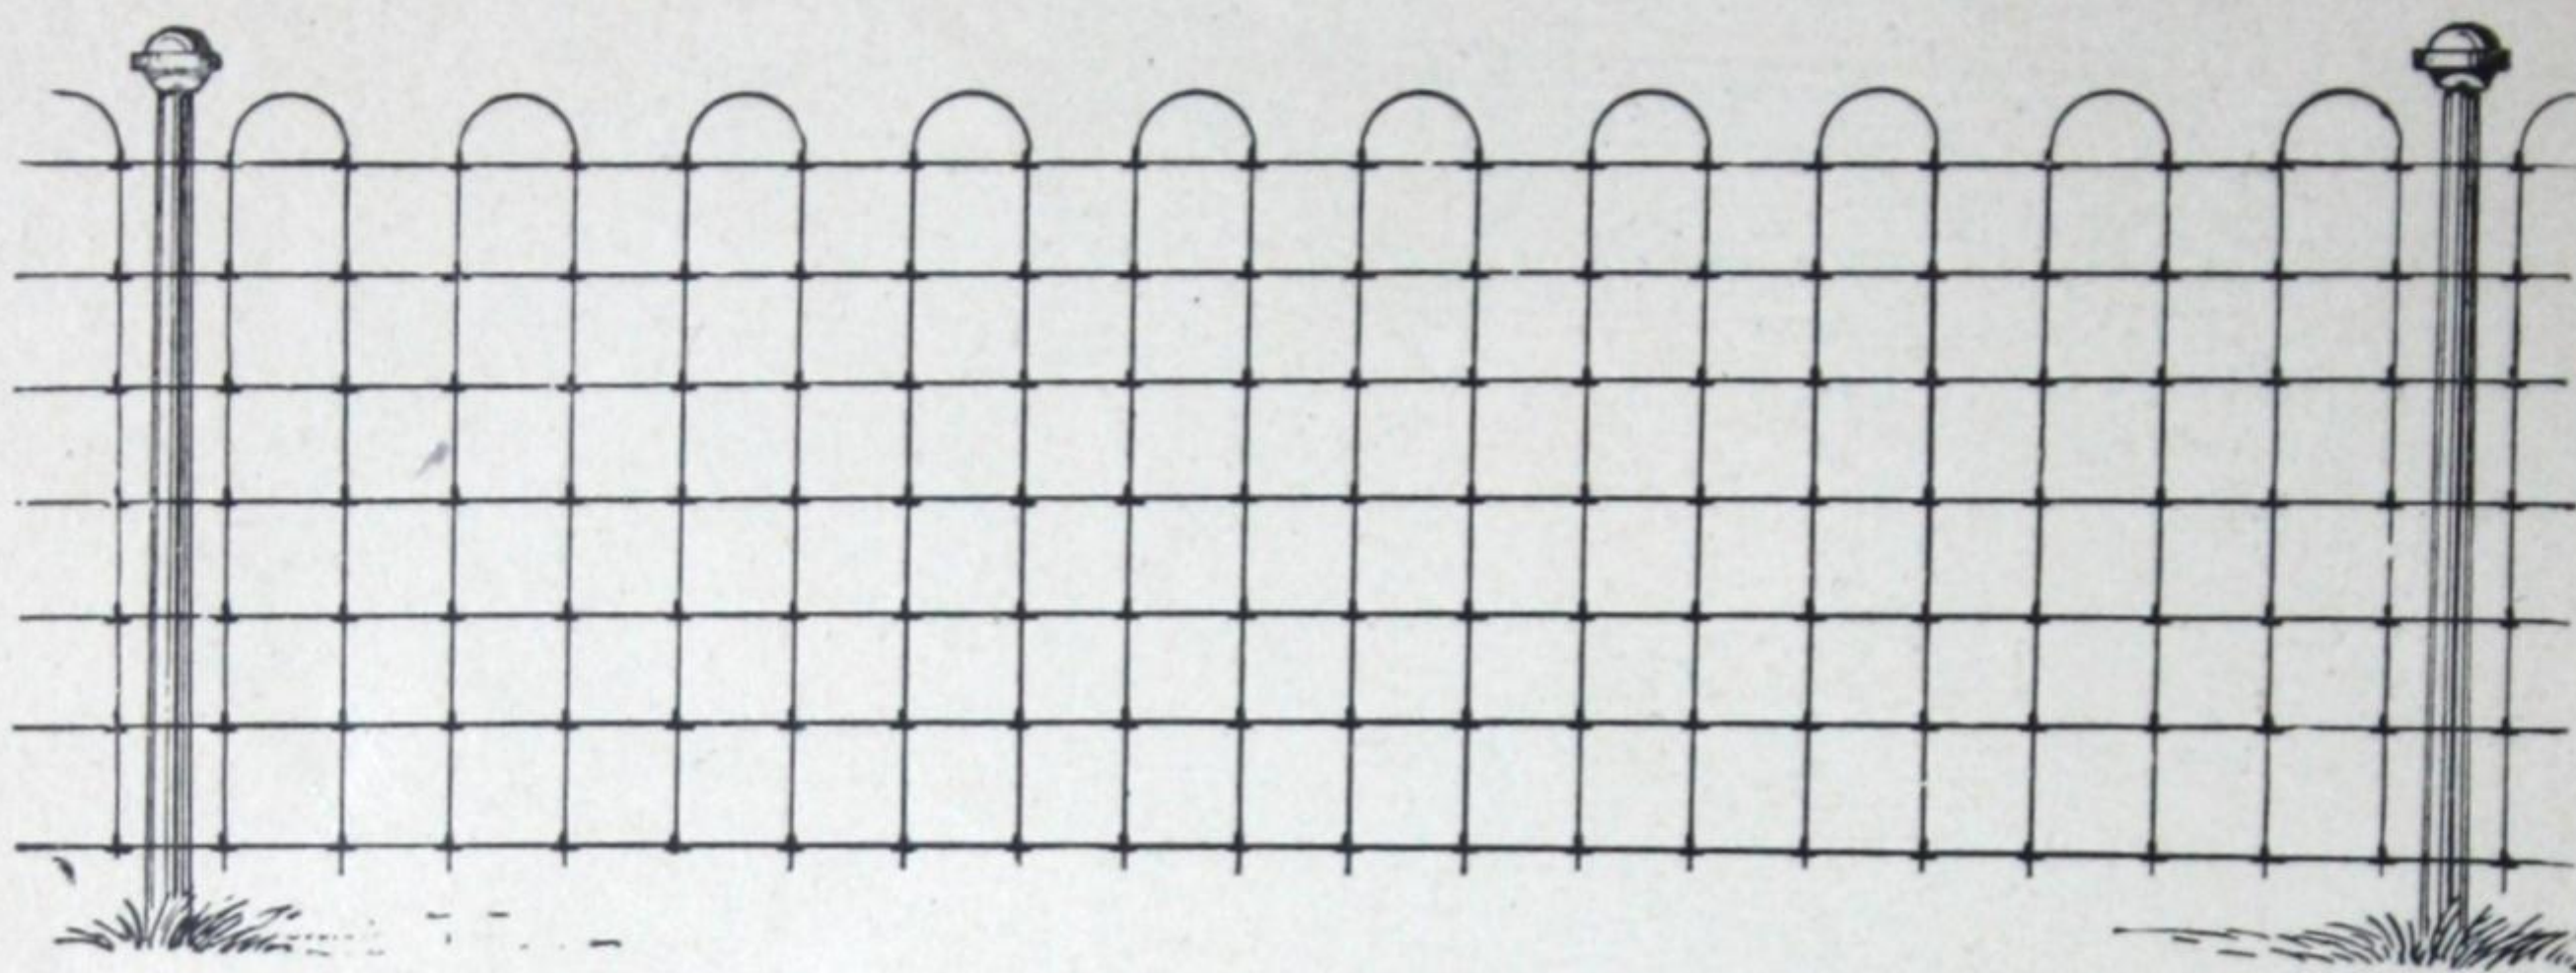

No. 1500P White, Price each	\$5.00
" 9500P Green, " "	5.00

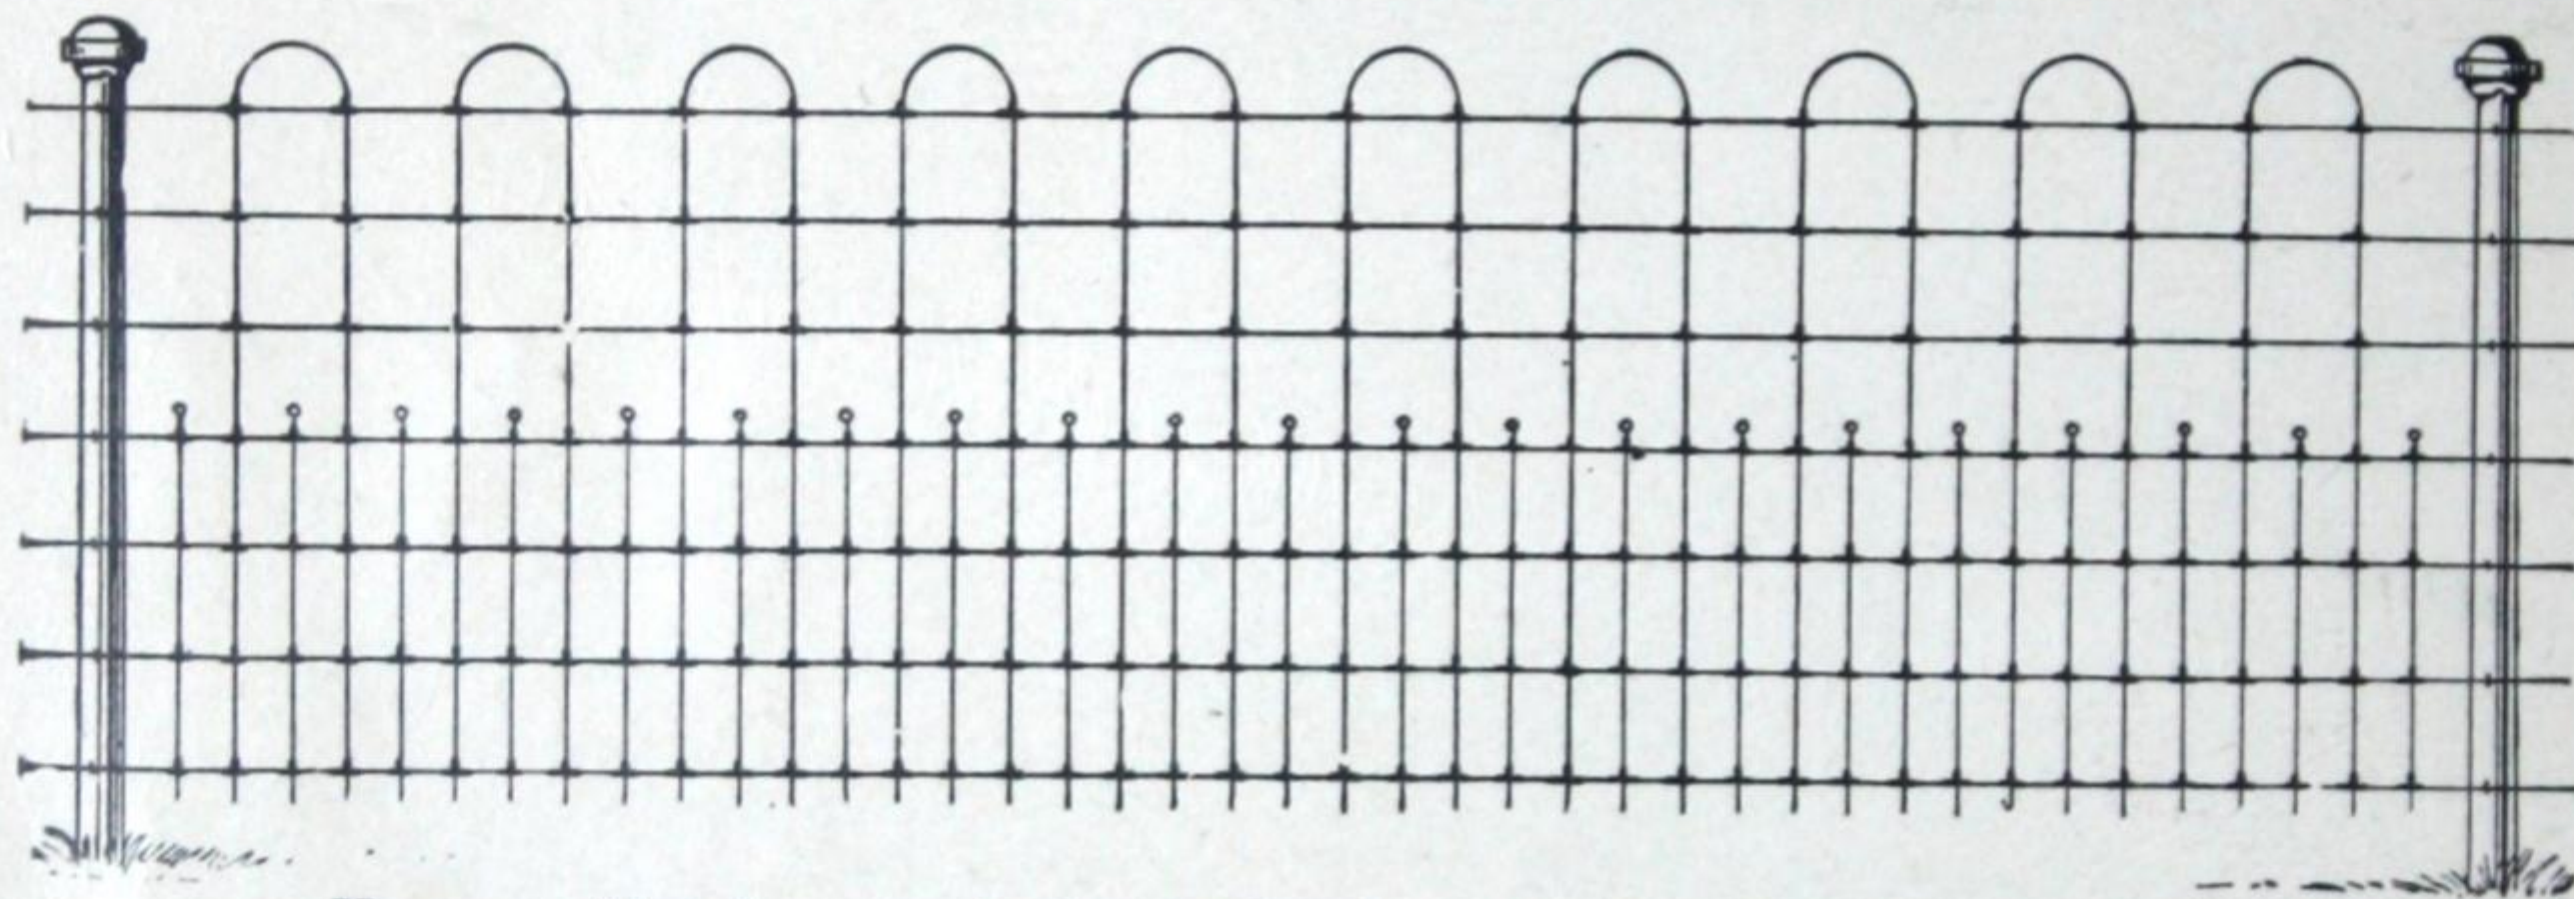

All these metallic designs in this Supplement are entirely new combinations of Leaves, Flowers, Etc., and have never been offered before to the trade.

ORNAMENTAL ANCHOR FENCES.

Constructed entirely out of the best quality of steel made. The fence itself is made of heavy galvanized No. 8 steel rod—these rods are firmly fastened at every intersection by the ANCHOR CLAMP, which clamp is made of hoop steel, galvanized. The fence is erected on a tubular steel post made of thick rolled sheet steel, thoroughly japanned. They are durable, and strong as any heavy cast iron fence ever made. Has an average tensile strength of over 4,000 pounds to the foot. They are no more expensive than the common lath or picket wooden fence and are much cheaper than any kind of an iron fence.

No. 1. Height 40 inches. Mesh 6x6.

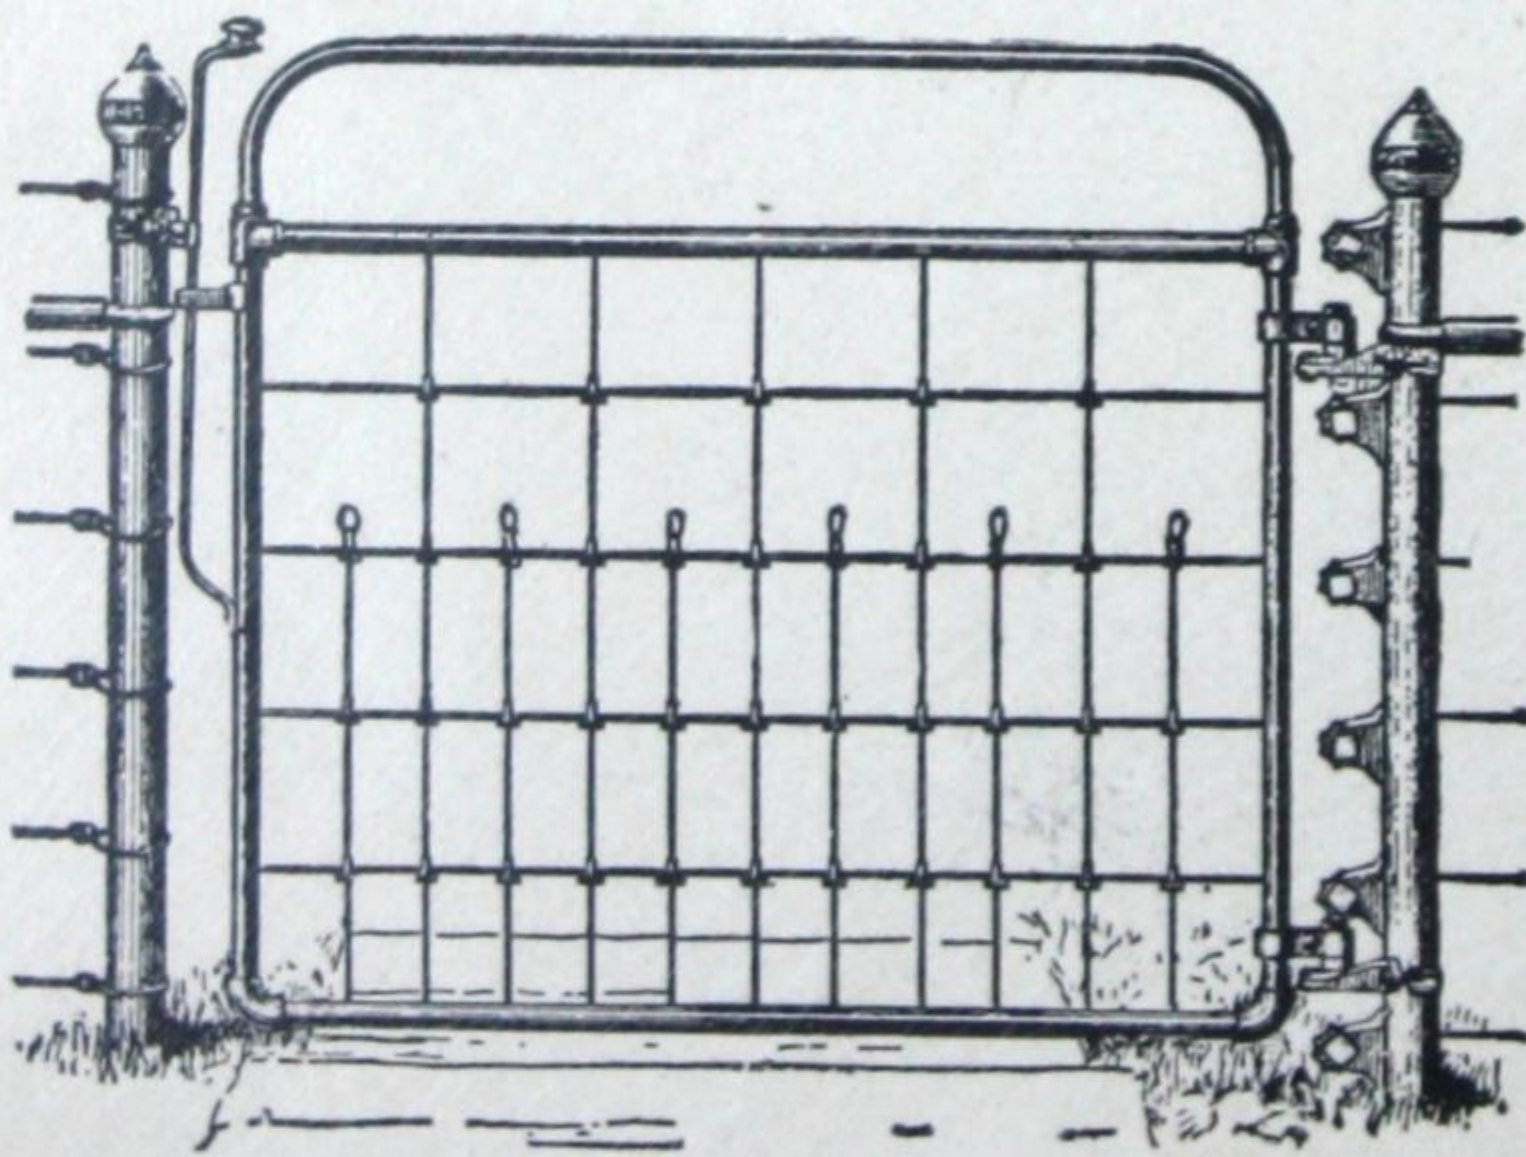

No. 2. Height, 40 inches. Mesh, at bottom, 3x6, top 6x6.

Ornamental Anchor Fences.

This fence should not be confounded with the common woven or crimped Wire Fences. In one the wire is weakened by every crimp, while in the Anchor Fences the steel rods are strengthened by every clamp applied. Also the Anchor Fence will not sag, while others do.

SINGLE ORNAMENTAL GATE.

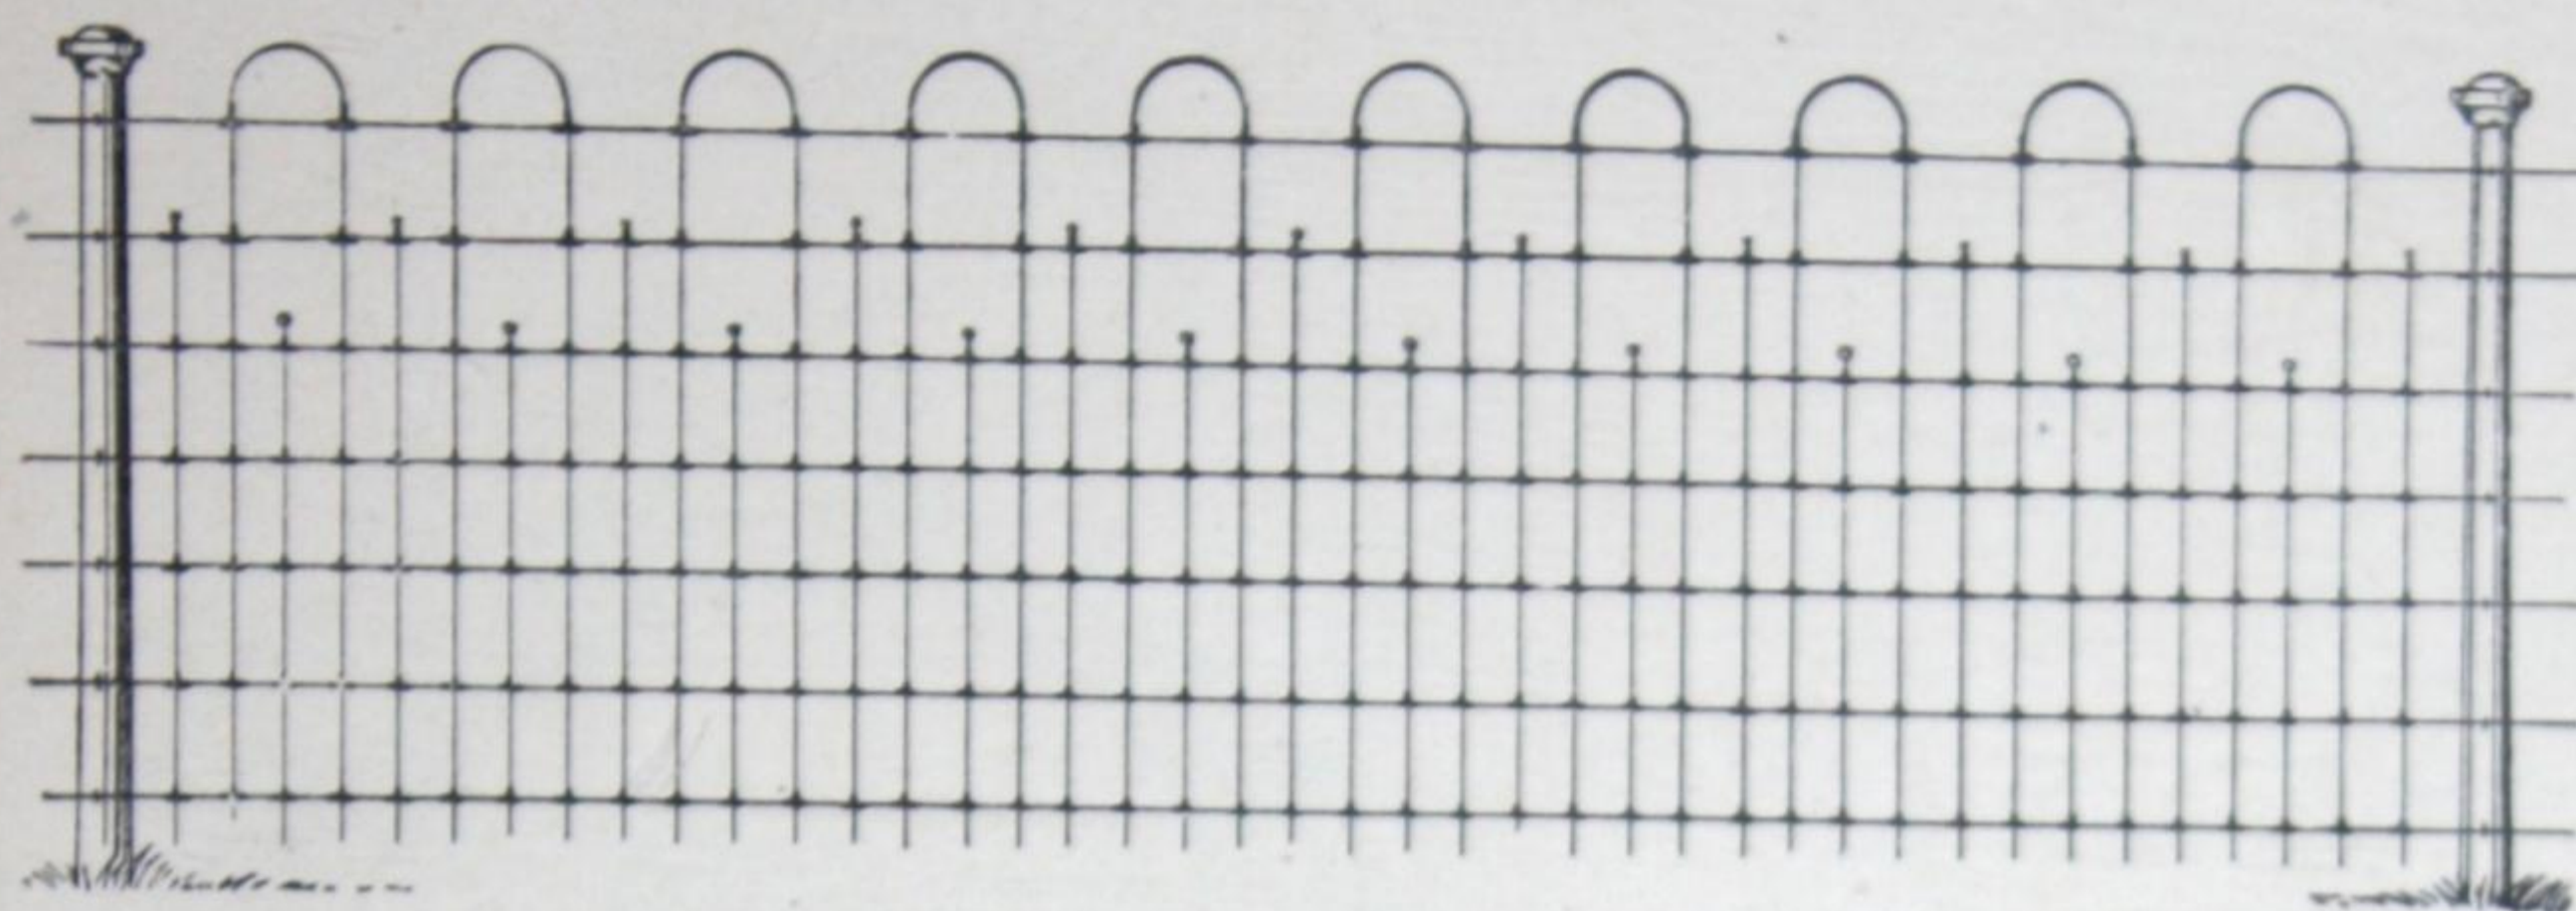

Style to correspond with fence. Built any size required. Frame made of $\frac{3}{4}$ inch gas pipe, center No. 8 galvanized steel wire secured with anchor clamps. Double Gates for driveways made on same principle. We make a specialty of Ornamental and Farm Gates. Cut shows but one of many styles.

If at a distance that you cannot conveniently call at our salesroom to examine these fences, just select from illustrations the design that you like, write us, advising as to the following:

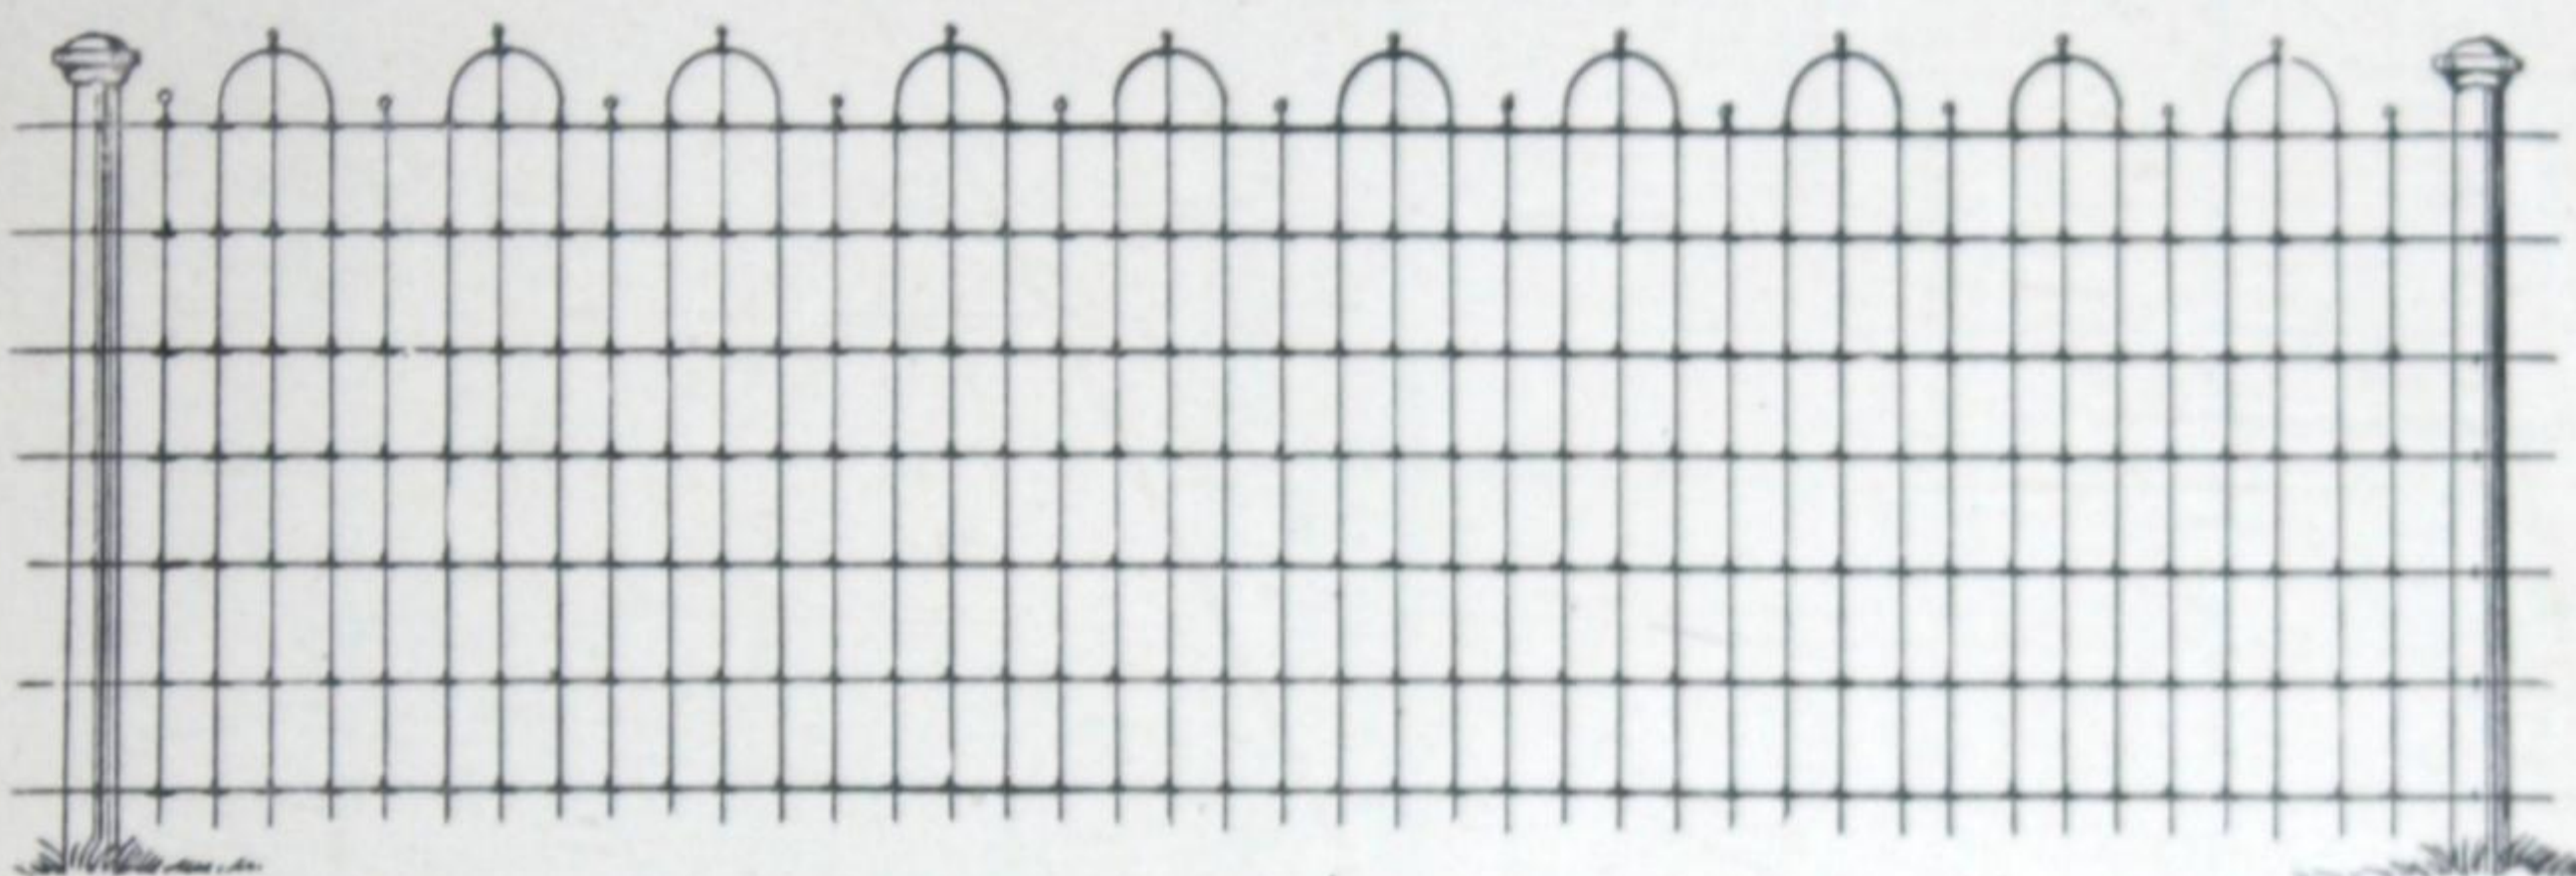

1. About how much in length required.
2. How many openings and gates, if any.
3. The lay of the land, also whether any ledge or rock formation exists.

Then we can give you an approximate cost of what we will furnish and set the fence, including fence, labor, transportation, etc., and give you full particulars.

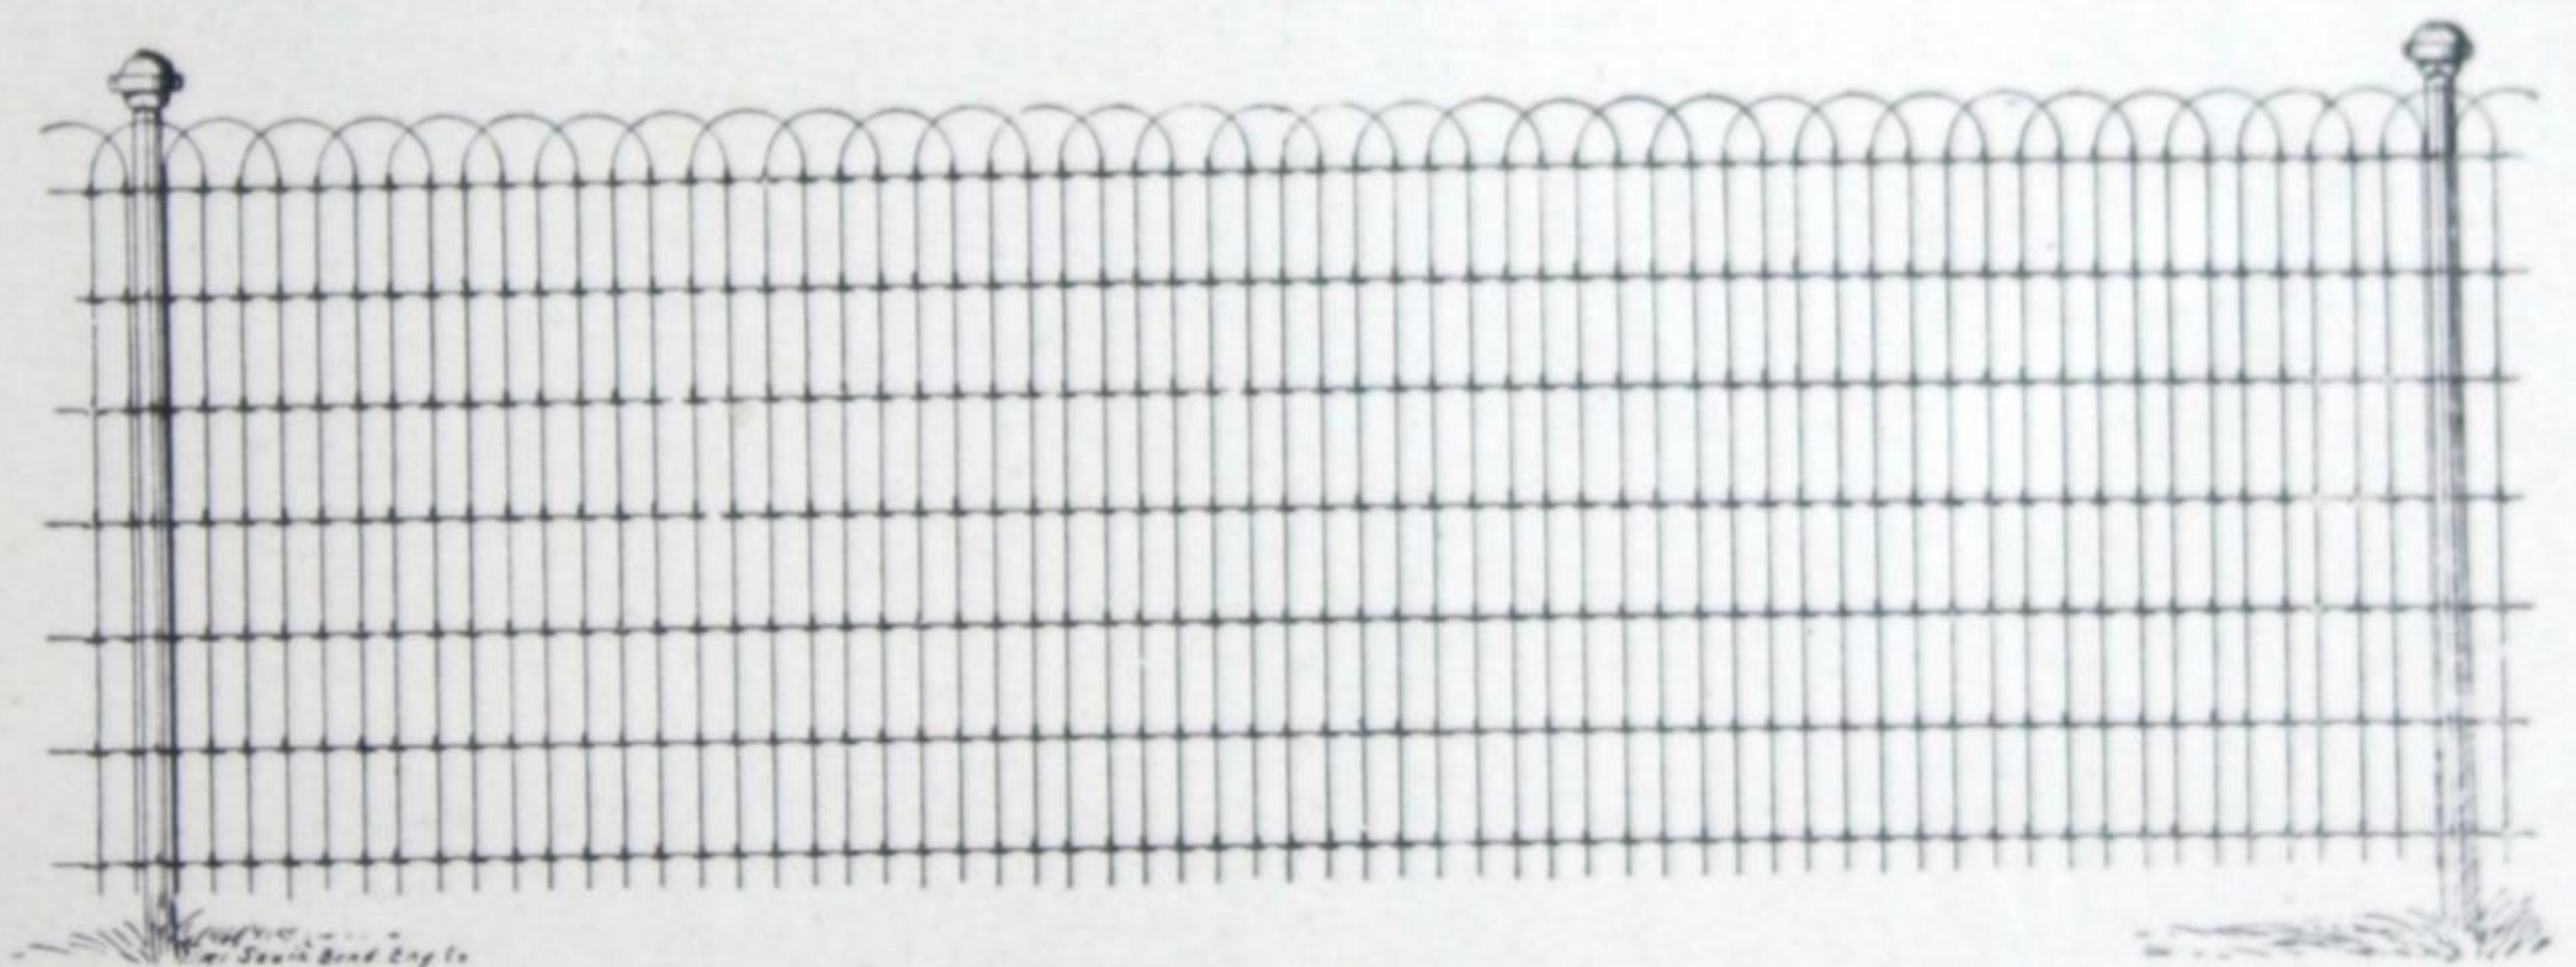

ORNAMENTED ANCHOR FENCES—Continued.

No. 3, Height, 40 inches. Mesh at bottom, 3x6. Top, 6x6.

No. 5, Height, 40 inches. Mesh, 3x6.

No. 6, Height, 40 inches. Mesh 2x6.

These styles of Fences can be delivered and set up on your place, furnishing all material and labor at prices from 45 cents to 65 cents per foot in length. According to the design selected, quantity required and distance from Boston.

FARM FENCE.

Horse High, Bull Proof, Sheep and Hog Tight.

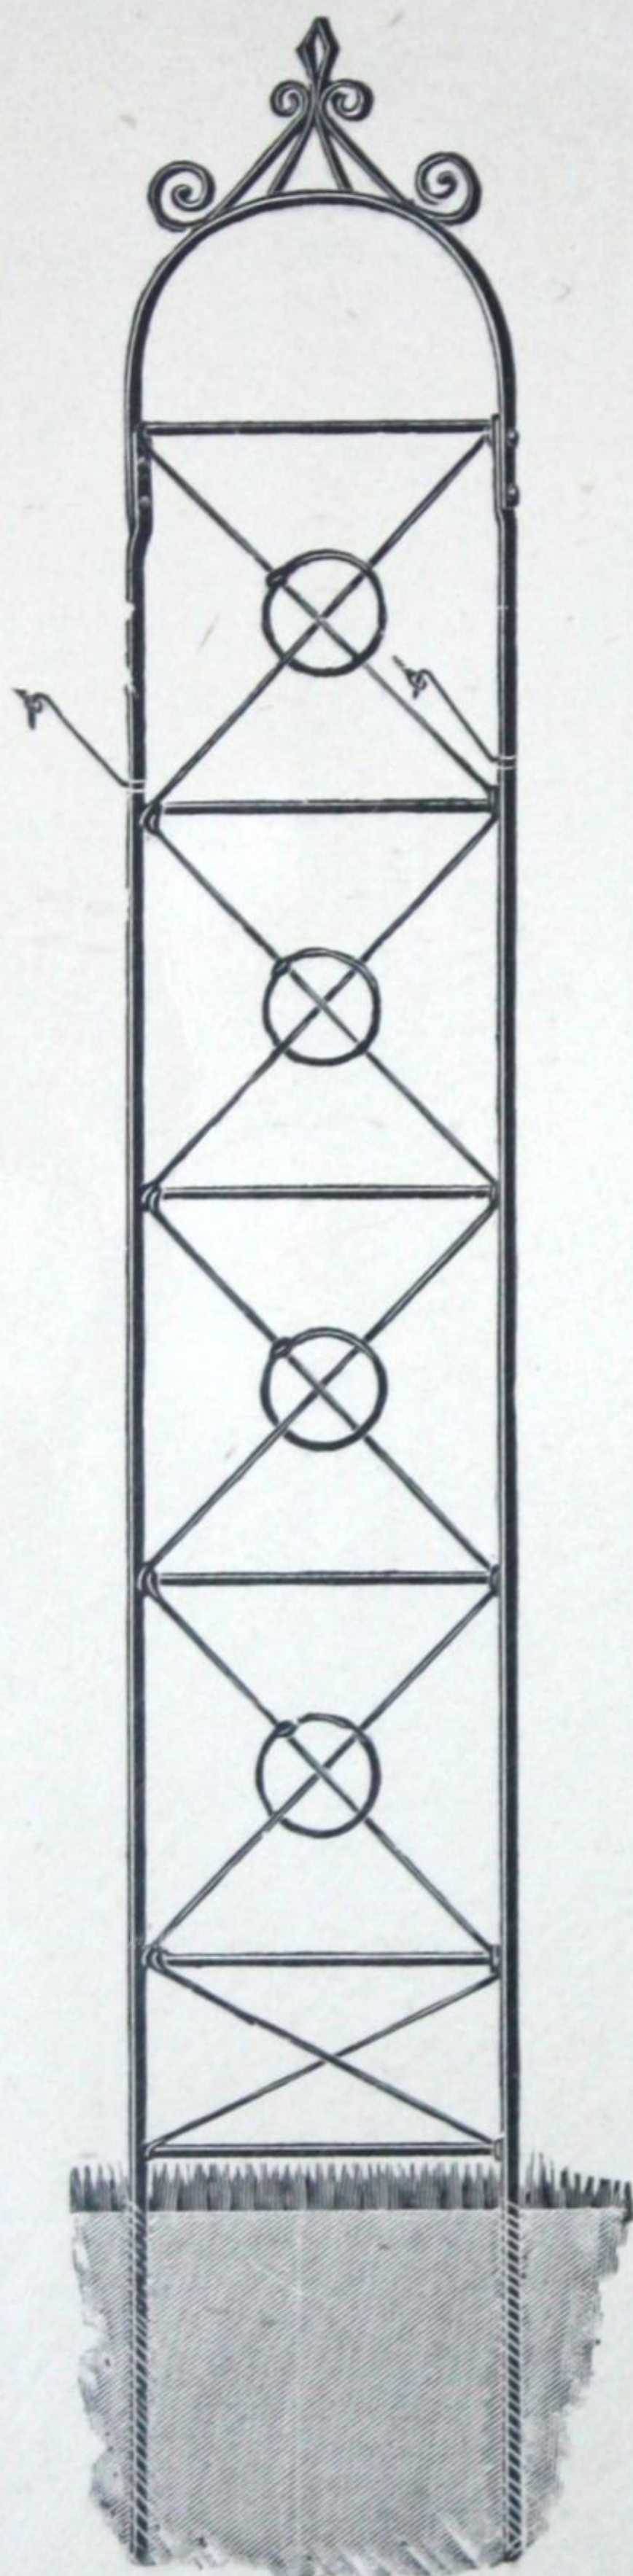

Constructed of eight strands of galvanized wire, with 50-inch uprights two feet apart. The tensile strength of No. 9 wire is equal to 12 strands of No. 11 wire, or 15 strands of No. 12. If we take into account the weakening effect of twisting the wires in the filling of all woven wire fences, the superiority of ANCHOR FENCE is apparent at a glance.

The Farm Fence is very much cheaper. \$3.85 to \$6.82 per each ten rods in rolls. Price for Farm Fence does not include delivery or setting up.

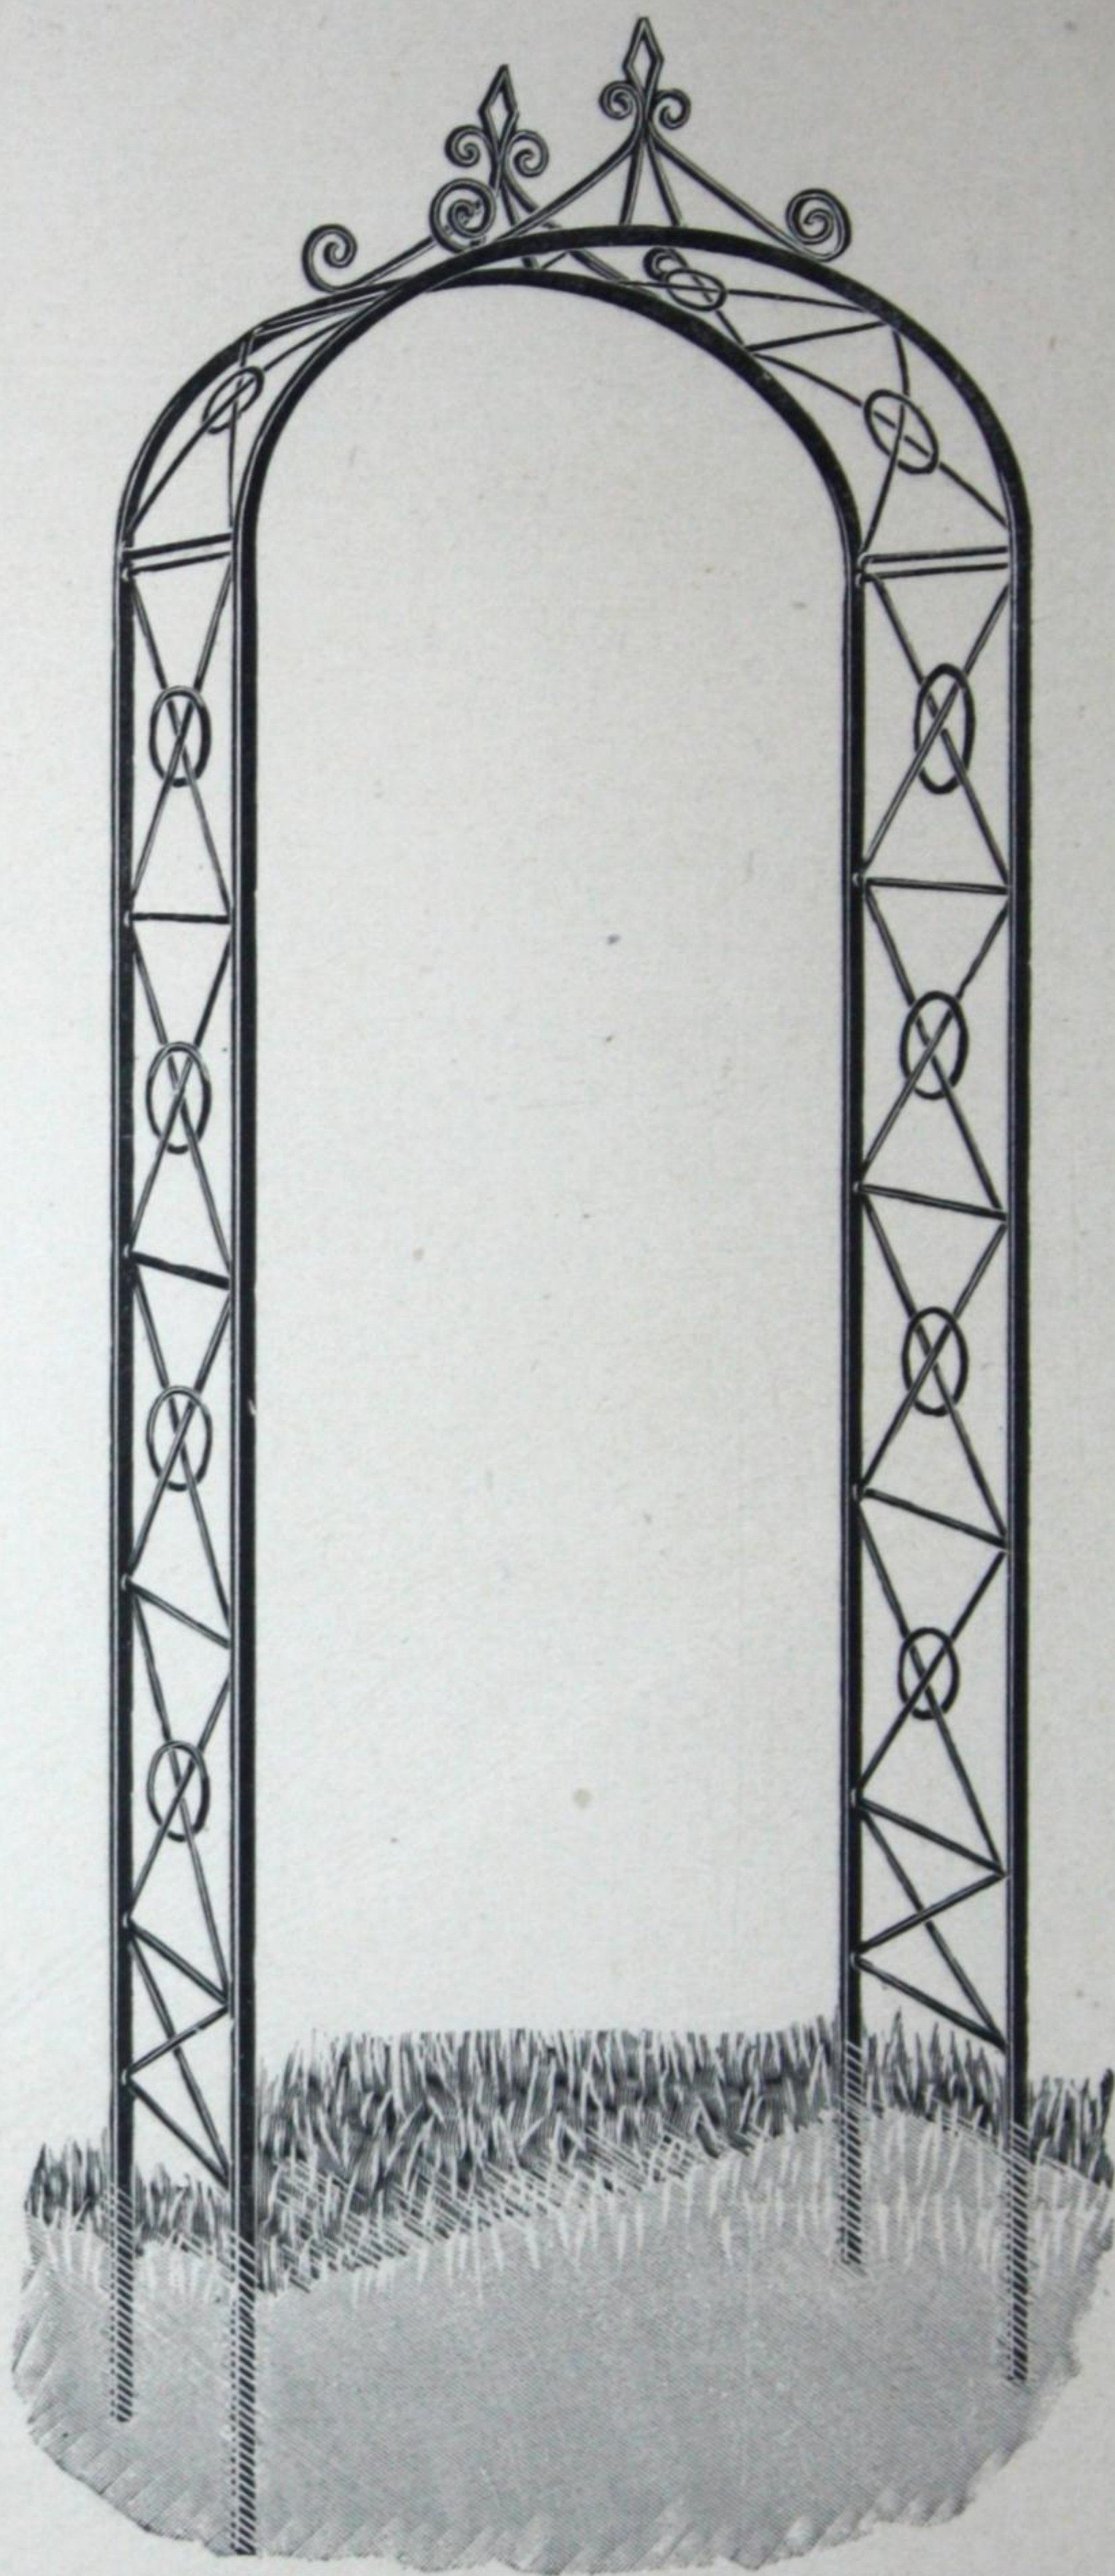

VERANDA TRELLIS.

Made of Steel and Wire.

GARDEN ARCHES.

Made of Steel and Wire.

Any size Arches or Trellises made to order.

Trays $7\frac{1}{2}$ x 30 inches, Price each
 No. 20 2 Wire Trays.....\$2.25

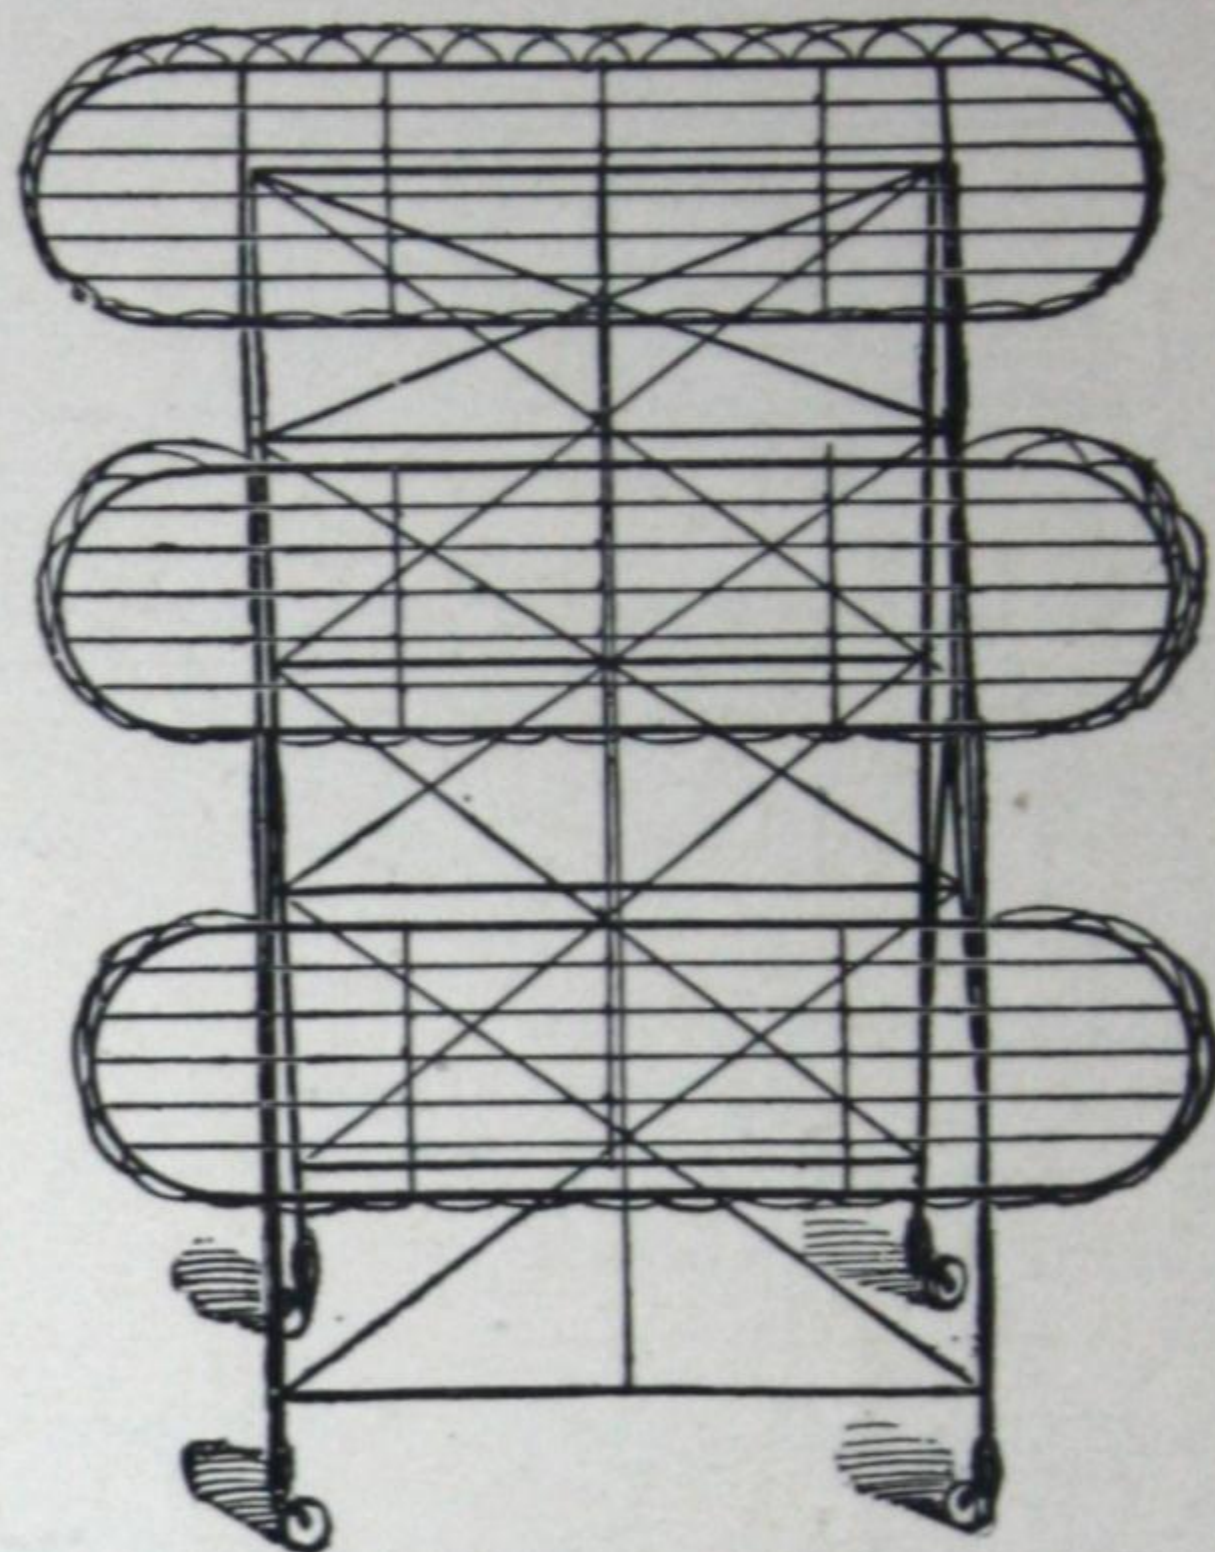

The most compact, strong, durable Plant Stands ever offered for sale, and at prices less than all others of the same capacity.

They pack closer than any other Plant Stand for shipment.

The ends are made of Flat Steel and have porcelain castors. The steel and iron work is finished in green and bronze.

The construction of the shelves or trays are such that there is more room for the pots and foliage than any other Plant Stand that takes up the same amount of room on the floor.

THREE-TRAY STAND FOLDED.

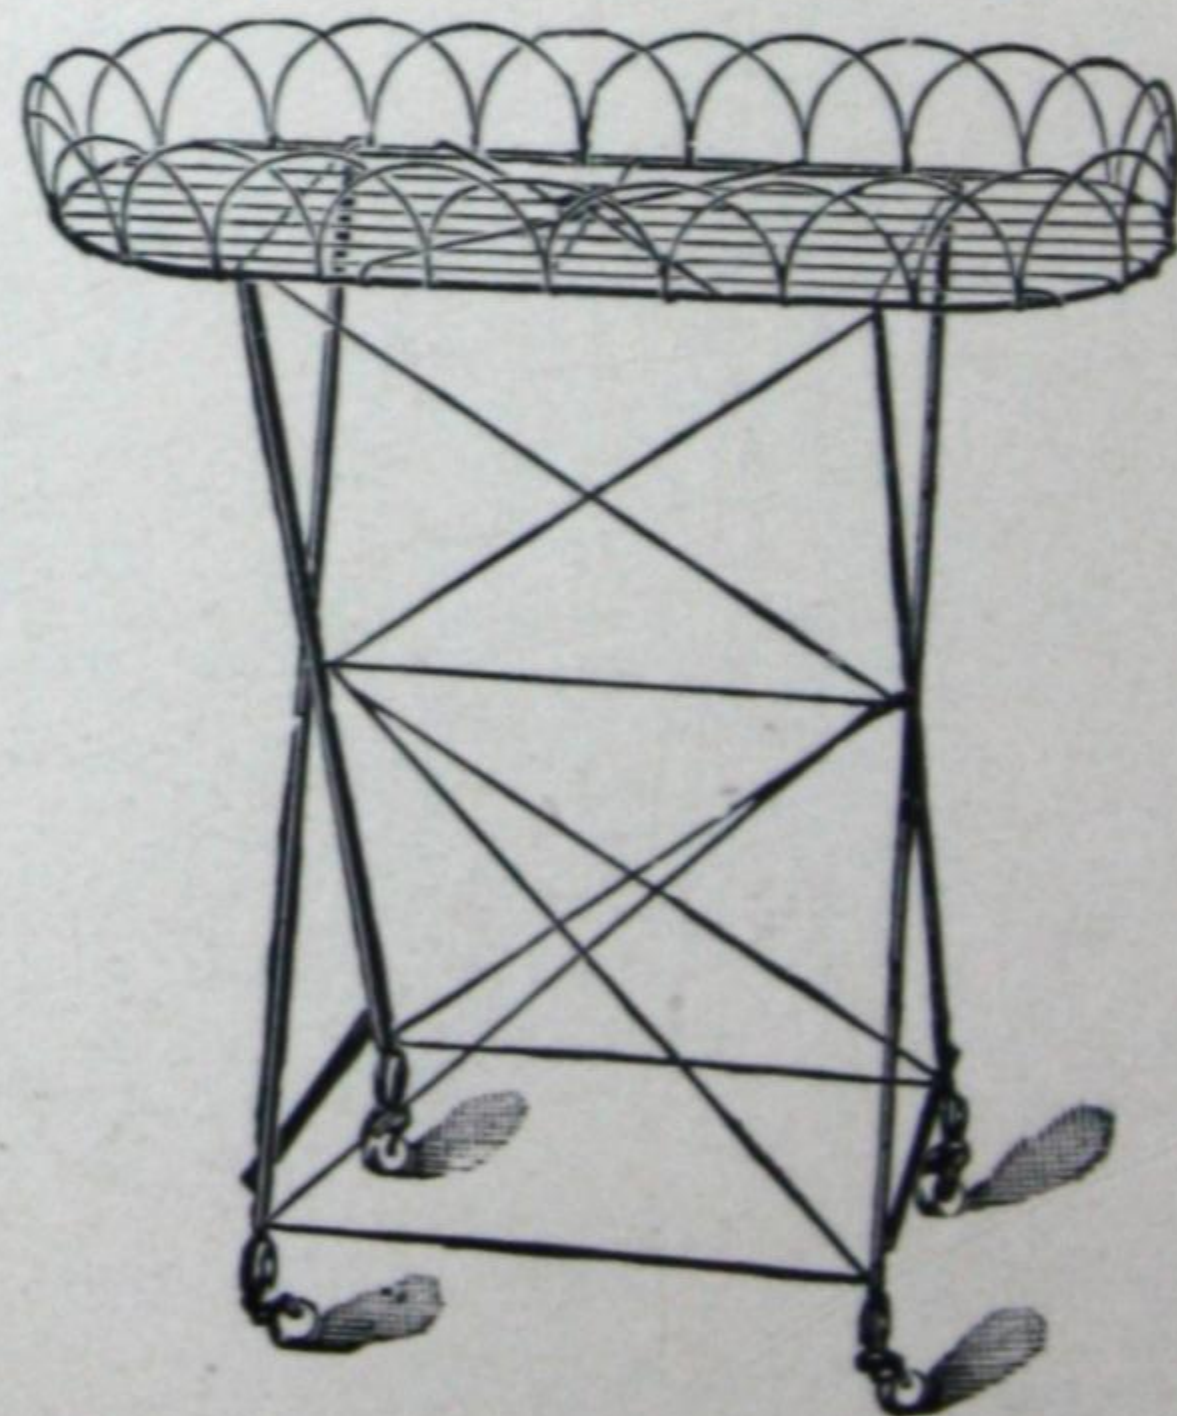

Can be opened or folded in a few seconds' time by simply spreading the Plant Stand apart at the bottom and dropping the cross bars into their places. Trays are in position and Plant Stand ready for use.

To fold it lift up the cross bars and close the stand together closely and it is folded.

The motion of spreading apart the Plant Stand opens the trays to position. The motion of closing it together folds it compactly.

NOS. 22 AND 23

FOUNTAINS.

THE LYMAN FOUNTAIN.

THE LYMAN FOUNTAIN, at Eaton Square, Dorchester, Mass., was constructed by M. D. Jones & Co. Dedicated October 24th, 1885. The largest and most elaborate Fountain in the New England States. Height, 26 feet; ground basin, 33 feet in diameter; first pan, 12 feet, 6 inches in diameter; second pan, 6 feet, 8 inches in diameter; 144 jets in rim of first pan; 80 jets in rim of second pan, and with the playing of water from different figures, and the four cascades at base of Fountain, makes the most beautiful water display imaginable.

We will furnish on application special designs of Fountains, with estimates.

Security Umbrella Holder.

Patented October 30th, 1883.

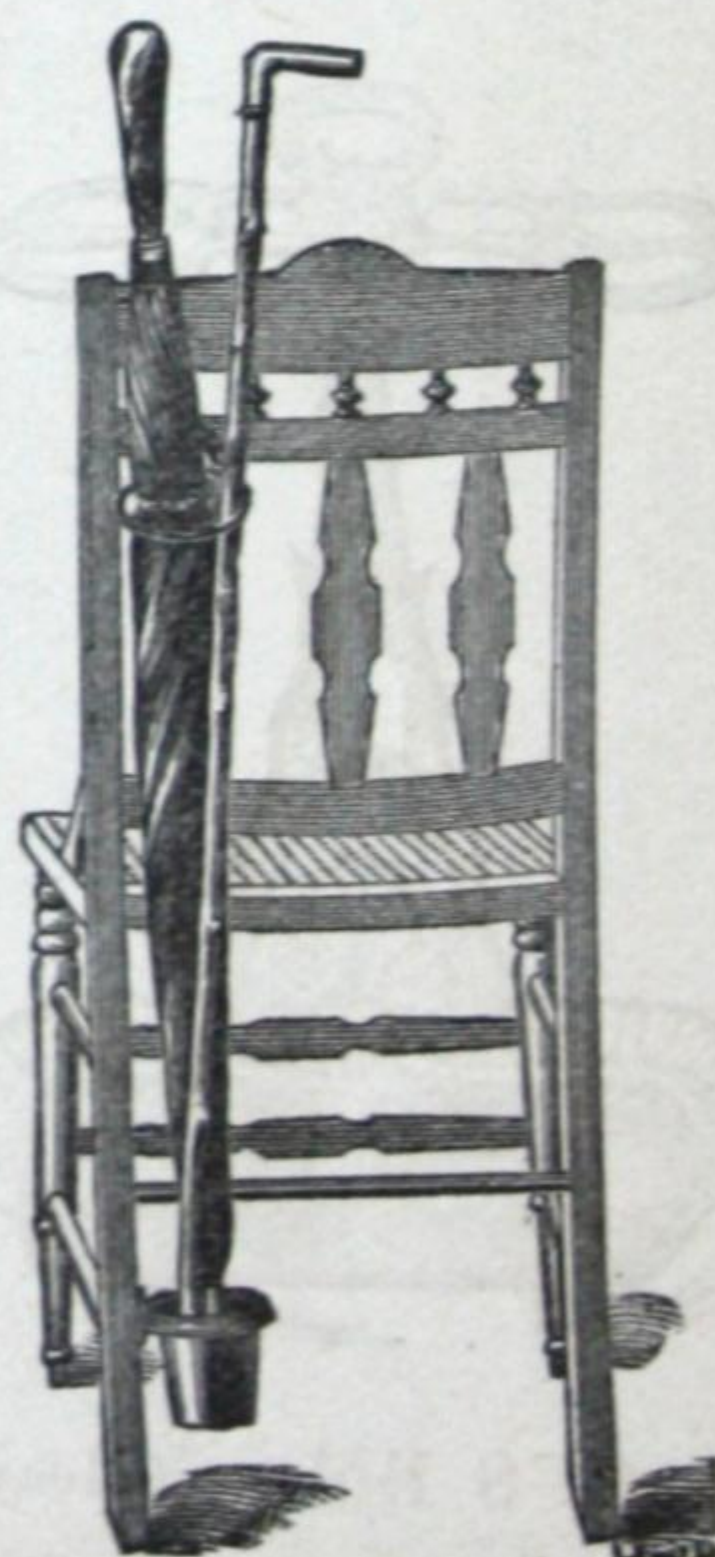

This is a new and useful device, easily attached to a chair, settee, or wall, in which a person in a hall, church, saloon, store, or other public place can stand his umbrella, so that it will be safe within sight.

It possesses these advantages: It is inexpensive, neat and durable; easily attached in any convenient corner or out-of-the-way place; occupies little space; folds back when not in use; retains all the drip from the umbrella; avoids the trouble of checking; prevents its loss or theft, and insures its presence when most needed.

DIRECTIONS.—Screw the hinged ring, so that the wire will fold down about eighteen inches above the bracket and cup, as shown in the cut.

Price per Set, 50 cents.
